The Earth and Its Inhabitants ... Elisée Reclus, 1884 The Feudatory and zemindari India, 1929 **Nepal's Enduring Poverty** Sukhdev Shah, 2015-08-18 Theory of economic growth has made remarkable progress over the past three decades that has helped give us a better understanding of factors that induce or inhibit growth In practice though a majority of countries have failed to increase growth and improve living conditions The elixir that has been absent from traditional growth theories is the role of an enabling environment that is needed to induce and support growth This book a case study of Nepal's poverty presents the view that non economic factors play an outsized role in determining the productive use of economic resources which is critical to spur growth to a much greater extent than the level of resources a country commands The theme developed in this book is that a country's institutional weaknesses create a hostile environment for economic growth to occur and be sustained Institutional handicaps exercise powerful constraints on the efficiency of use of resources and creation of wealth This happens because institutions are rooted in a country's history its culture emotions and even in national psychology

Fatalism and Development Dor Bahadur Bista, 1991 The book concentrates on the social and cultural factors which lie behind the current Nepal crisis, locating the root cause in the Brahmin Chhetri minority which dominates Kathmandu and other towns. Fatalism and the caste system still flourish behind the facade of modern bureaucracy at all levels of government in education, foreign aid, politics and administration.
