**Principles Of International Politics: People's Power, Preferences, and Perceptions, 3rd Edition** Bruce Bueno De Mesquita, 2006 Leaders want to stay in power Their self interest is the decisive motivation for action in the international arena and forms the theoretical backbone for this exciting departure from other introductory international relations texts Through its discussion and development of the strategic perspective Principles of International Politics shows students how leaders translate their personal interests and ambitions into actions of the state and convincingly demonstrates how international and domestic politics are inextricably linked Clearly explaining both the foundational ideas of international relations as well as the key concepts of the strategic perspective Bueno de Mesquita effectively links these to the analytic tools students will employ throughout

Our Money Leah Downey, 2024-12-10 How the creation of money and monetary policy can be more democratic The power to create money is foundational to the state In the United States that power has been largely delegated to private banks governed by an independent central bank Putting monetary policy in the hands of a set of insulated nonelected experts has fueled the popular rejection of expertise as well as a widespread dissatisfaction with democratically elected officials In Our Money Leah Downey makes a principled case against central bank independence CBI by both challenging the economic theory behind it and developing a democratic rationale for sustaining the power of the legislature to determine who can create money and on what terms How states govern money creation has an impact on the capacity of the people and their elected officials to steer policy over time In a healthy democracy Downey argues the balance of power over money creation matters Downey applies and develops democratic theory through an exploration of monetary policy In so doing she develops a novel theory of independent agencies in the context of democratic government arguing that states can employ expertise without being ruled by experts Downey argues that it is through iterative governance the legislature knowing and regularly showing its power over policy that the people can retain their democratic power to guide policy in the modern state As for contemporary macroeconomic arguments in defense of central bank independence Downey suggests that the purported economic benefits do not outweigh the democratic costs

**Natural Potency and Political Power** Sarinda Singh, 2012-01-31 Forests as physical entities have received considerable scholarly attention in political studies of Asia and beyond. Much less notice has been paid to the significance of forests as symbols that enable commentary on identity aspirations and authority. **Natural Potency and Political Power** an innovative exploration of the social and political importance of forests in contemporary Laos challenges common views of the rural countryside as isolated and disconnected from national social debates and politics under an authoritarian regime. It offers instead a novel understanding of local perspectives under authoritarianism demonstrating that Lao people make implicit political statements in their commentary on forests and wildlife and showing that in addition to being vital material resources forests and their natural potency are linked in the minds of many Lao to the social and political power of the state. Sarinda Singh explores the intertwining of symbolic and material concerns in local debates over conservation and development, the popularity of wildlife consumption, the particular importance of elephants and forest loss and mismanagement. In doing so she draws on ethnographic fieldwork around Vientiane, the capital, and Nakai, site of the contentious Nam Theun 2 hydropower project, places that are broadly reflective of the divide between urban prosperity and rural poverty. Nam Theun 2, supported by the World Bank, highlights the local, regional and global dynamics that influence discussions of forest resources in Laos. Government officials, rural villagers and foreign consultants all contribute to competing ideas about forests and wildlife. Singh advances research on forest politics by rethinking how ideas about nature influence social life. Her work refutes the tendency to see modern social life as independent of historical influences and her attention to viewpoints both inside and outside the state prompts an understanding of authoritarian regimes as not only sources of repression but also sites of negotiation, engagement and debate about the legitimacy of social inequalities.

Engagement with and between a plurality of progressive non neoclassical traditions is an important step in fostering a more capacious understanding of sustainability both as a concept and as a political objective To that end this book provides a critical overview of the development of alternative perspectives on the economics of sustainability highlighting the presence of various strands of heterodox economics and radical ecology and arguing that greater engagement between these schools of thought is required to help formulate viable alternatives to the prevailing neoliberal ideology The chapters in Part I of this volume Ecofeminism Social Ecological Economics Bioeconomics Steady State present a series of concrete policy proposals for building socially just sustainable socio economic processes Each chapter utilizes the acumen of a given heterodox tradition to formulate policy reforms to secure this objective In Part II Heterodox Macroeconomics and Sustainability the contributors make the case for more radical forms of socio economic transformation particularly emphasizing community local and regional level initiatives for change The final part Circular Economy Civil Economy and Other Heterodox Contributions reflects on the potential strategic political economic contribution of heterodox economics to building more

sustainable and just socio economic practices in a broader sense These chapters demonstrate that heterodox economics and radical ecology can productively contribute to realizing sustainability in areas such as economic pedagogy through working in conjunction with other social justice movements and by challenging extant neoliberal ideologies of sustainability They also deliberate on some of the institutional and epistemological challenges that confront heterodox practitioners seeking to make such an impact This volume is essential reading for anyone concerned with a viable alternative conception of the economy and sustainability including readers from all schools of heterodox economics and radical ecology and people and organizations involved in various ways in building an alternative political economy of sustainability
