People The Land Pathways To Reform I:

A Fractured North Erich Kasten, Igor Krupnik, Gail Fondahl, 2025-03-03 The volumes of the Fractured North series address research collaborations in Siberia and the Russian North that are now at risk or frozen and how partnerships might be restored under the evolving political situation The first two volumes explored ethical and moral dilemmas of continuing collaborative studies in the fractured North and the ramifications of ceasing such collaborations While many scholars have pivoted their attention to other regions others have maintained their focus on the Russian North striving to sustain the circumpolar approach of the past decades Contributions in this third volume deal with how we might move forward despite the many fissures in our field Moving forward includes a variety of approaches adopting newer methodologies for carrying out studies from afar e.g. netography establishing new connection hubs at Western institutions maintaining already established collaborations via joint meetings on neutral territory and more We anticipate that these volumes together will provide a record of the reflections concerns anguish and inspirations of over fifty social scientists who chose the Russian North as their locus of research We also dearly hope that it will serve as a historic account of a period of fracture that will before long heal

Environmental Justice and Sustainability in the Former Soviet Union Julian Agyeman, Yelena Ogneva-Himmelberger, 2009 An examination of the awareness of environmental and social justice issues in the former Soviet republics from the Western style democracies of the Baltic region to the totalitarian regimes of Central Asia and the resulting activism in those states The

legacy of environmental catastrophe in the states of the former Soviet Union includes desertification pollution and the toxic aftermath of industrial accidents the most notorious of which was the Chernobyl disaster of 1986 This book examines the development of environmental activism in Russia and the former Soviet republics in response to these problems and its effect on policy and planning It also shows that because of increasing economic ethnic and social inequality in the former Soviet states debates over environmental justice are beginning to come to the fore The book explores the varying environmental social political and economic circumstances of these countries which range from the Western style democracies of the Baltic states to the totalitarian regimes of Central Asia and how they affect the ecological environmental and public health Among the topics covered are environmentalism in Russia including the progressive nature of its laws on environmental protection which are undermined by overburdened and underpaid law enforcement the effect of oil wealth on Azerbaijan and Kazakhstan the role of nationalism in Latvian environmentalism the struggle of Russia's indigenous peoples for environmental justice public participation in Estonia's environmental movement and lack of access to natural capital in Tajikistan Environmental Justice and Sustainability in the Former Soviet Union makes clear that although fragile transition economies varying degrees of democratization and a focus on national security can stymie progress toward just sustainability the diverse states of the former Soviet Union are making some progress toward green and environmental justice issues separately

its limitations Through a meticulous analysis of each of these domains Habeck shows how public discourse about reindeer husbandry as a traditional life style derives from outside the Komi reindeer herding communities yet it has powerful effects on the local actors ability to frame their own existence He argues that the concept of tradition despite its many positive connotations places Komi reindeer herders in a golden cage which leaves no space for acknowledging their drive to innovation and flexibility
