What the Rest Think of the West Laura Nader, 2015-09-08 Over the past few centuries as Western civilization has enjoyed an expansive and flexible geographic domain Westerners have observed other cultures with little interest in a return gaze In turn these other civilizations have been similarly disinclined when they have held sway Clearly though an external frame of reference outstrips introspection we cannot see ourselves as others see us Unprecedented in its scope What the Rest Think of the West provides a rich historical look through the eyes of outsiders as they survey and scrutinize the politics science technology religion family practices and gender roles of civilizations not their own The book emphasizes the broader figurative meaning of looking west in the scope of history Focusing on four civilizations Islamic Japanese Chinese and South Asian Nader has collected observations made over centuries by scholars diplomats missionaries travelers merchants and students reflecting upon their own Wests These writings derive from a range of purposes and perspectives such as the seventh century Chinese Buddhist who goes west to India the missionary from Baghdad who travels up the Volga in the tenth century and meets the Vikings and the Egyptian imam who in 1826 is sent to Paris to study the French The accounts variously express critique adoration admiration and fear and are sometimes humorous occasionally disturbing at times controversial and always enlightening With informative introductions to each of the selections Laura Nader initiates conversations about the power of representational practices

Sunderman,2023-09-01 Dilemmas of Allyship investigates the political phenomenon of social justice allyship in the form of white anti racism from a novel perspective The book argues that 21st century allyship is best understood as a set of socially mediated personal problems and challenges and that these problems and challenges furnish the material with which many allies identities are formed Through an analysis of in depth interviews with white American anti racist activists Dilemmas of Allyship provides a picture of the ambivalent struggles with which allies grapple tracing the theoretically irreducible contradictions they regularly encounter These contradictions or dilemmas are central to the ongoing project of many white activists allyship presenting them again and again with challenges that test their authenticity and commitment The book also investigates how these same dilemmas can become practically reducible through a set of mitigating factors and strategies that intervene in and redefine allyship crises Taken together these analyses present a picture of allyship rarely seen one of a lifestyle intrinsically marked by the kinds of challenges people typically avoid Dilemmas of Allyship takes allies on their own terms paying attention to the true ambivalence of their struggles refusing to reduce these experiences to mere success or failure As a result it is able to contribute to discussions of identity politics and white fragility by presenting a clear picture of the existential stakes of allyship With this picture in hand we can better appreciate what challenges exist within the 21st century movement for racial justice and we can also learn something more fundamental about what it means to be a person in a contested conflictual social world
