home **The Concept of Peace in Judaism, Christianity and Islam** Georges Tamer, 2020-10-26 The eighth volume of the series Key Concepts of Interreligious Discourses investigates the roots of the concept of peace in Judaism Christianity and Islam and its relevance for the present time Facing present violent conflicts waged and justified by religious ideas or reasons peace building prevails in current debates about religion and peace Here the central question is How may traditional sources in religions help to put down the weapons and create a society in which everyone can live safely without hostilities and the threat of violence When we take the Sacred Scriptures of Judaism Christianity and Islam into consideration it becomes obvious that the term peace and its equivalents in Hebrew Greek and Arabic describe at first an ideal state based on the love mercy of God to his creation It is a divine gift that brings inward peace to the individuum and outer peace resting upon justice and equality One main task of Jews Christian and Muslims in the history is to find out how to bring down this transcendent ideal upon earth The volume presents the concept of peace in its different aspects as anchored in the traditions of Judaism Christianity and Islam It unfolds commonalities and differences between the three monotheistic religions as well as the manifold discourses about peace within these three traditions The book offers fundamental knowledge about the specific understanding of peace in each one of these traditions their interdependencies and their relationship to secular world views Evolutionary Intelligence Rolf W. Frohlich, 2009-04 Human nature holds the intelligence of life It provides a psychology that is much stronger more effective and more reliable than the psychology society teaches us This psychology taps into the evolutionary survival experience of our species which occupied most of human history It was the period when the species evolved and our ancestor survived as a hunter and gatherer More than 99% of human history is encoded in the DNA of our genes and lastingly etched into the human psyche Our natural psychology the human psyche is the result of evolutionary adaptation The psyche provides the genetic capacity for behavioral mental and spiritual adaptation It supports the gratification of our needs And it contains the blueprint of human life The book is about human nature and human survival Human nature that is the human psyche has survival value The book introduces a metapsychology that refers to the Jungian archetypes and the survival capabilities inherent in the psyche Like all living organisms and forms of life we possess an innate capacity for survival By awakening this evolutionary intelligence we gain access to the primordial power and wisdom of the archetypal psyche This innate psychology transcends the cultural conditioning that has shaped us all and erects an entirely different reference system making us look at life in a new way We live in a world that reflects human nature and we are well equipped to survive in it Beyond that there is also something in us that resonates with a larger context Our psychological constitution relates us to the outer realities of nature and cosmos It is in this sense that we partake in the evolution of life on this planet and in the larger design of a cosmic universe This primary psyche is shared by all humanity as part of a common biological and psychological history **Reconstructing Woman** Dorothy Kelly, 2010-11 Reconstructing Woman explores a scenario common to the works of four major French novelists of the nineteenth century Balzac Flaubert

Zola and Villiers In the texts of each author a new Pygmalion as Balzac calls one of his characters turns away from a real woman he has loved or desired and prefers instead his artificial re creation of her All four authors also portray the possibility that this simulacrum which replaces the woman could become real The central chapters examine this plot and its meanings in multiple texts of each author with the exception of the chapter on Villiers in which only L Eve future is considered The premise is that this shared scenario stems from the discovery in the nineteenth century that humans are transformable Because scientific innovations play a major part in this discovery Dorothy Kelly reviews some of the contributing trends that attracted one or more of the authors mesmerism dissection transformism and evolution new understandings of human reproduction spontaneous generation puericulture the experimental method These ideas and practices provided the novelists with a scientific context in which controlling changing and creating human bodies became imaginable At the same time these authors explore the ways in which not only bodies but also identity can be made In close readings Kelly shows how these narratives reveal that linguistic and coded social structures shape human identity Furthermore through the representation of the power of language to do that shaping the authors envision that their own texts would perform that function The symbol of the reconstruction of woman thus embodies the fantasy and desire that their novels could create or transform both reality and their readers in quite literal ways Through literary analyses we can deduce from the texts just why this artificial creation is a woman

Refugees and the Ethics of Forced Displacement Serena Parekh, 2016-11-25 This book is a philosophical analysis of the ethical treatment of refugees and stateless people a group of people who though extremely important politically have been greatly under theorized philosophically The limited philosophical discussion of refugees by philosophers focuses narrowly on the question of whether or not we as members of Western states have moral obligations to admit refugees into our countries This book reframes this debate and shows why it is important to think ethically about people who will never be resettled and who live for prolonged periods outside of all political communities Parekh shows why philosophers ought to be concerned with ethical norms that will help stateless people mitigate the harms of statelessness even while they remain formally excluded from states The Open Access version of this book available at <https://doi.org/10.4324/9781315883854> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
