Expanding Fields of Architectural Discourse and Practice Matthew Butcher, Megan O'Shea, 2020-11-27 Expanding Fields of Architectural Discourse and Practice presents a selection of essays architectural experiments and works that explore the diversity within the fields of contemporary architectural practice and discourse Specific in this selection is the question of how and why architecture can and should manifest in a critical and reflective capacity as well as to examine how the discipline currently resonates with contemporary art practice It does so by reflecting on the first 10 years of the architectural journal P E A R 2009 to 2019 The volume argues that the initial aims of the journal to explore and celebrate the myriad forms through which architecture can exist are now more relevant than ever to contemporary architectural discourse and practice Included in the volume are architectural practitioners design researchers artists architectural theorists historians journalists curators and a paleobiologist all of whom contributed to the first seven issues of the journal Here they provide a unique presentation of architectural discourse and practice that seeks to test new ground while forming distinct relationships to recent and more longstanding historical legacies Praise for Expanding Fields of Architectural Discourse and Practice The story told by the authors of this work can thus be considered as the central tool of an architectural transgression Critique d art

Kenosis Creativity Architecture Randall S. Lindstrom, 2021-03-21 Kenosis Creativity Architecture locates and explores creativity's grounding in the ancient concept of kenosis the emptying that allows creativity to happen that makes appearance possible It concretises that grounding through architecture a primal expression of human creativity critically examining for the first time kenotic instantiations evidenced in four iconic international projects works by Kahn Pei Ando and Libeskind Then in a final turn the potentiality of architecture's own emptying is probed Architect and author Randall Lindstrom draws on

Western and Eastern philosophy including that of Heidegger Levinas Derrida Vattimo Nishida and Nishitani as well as on the theology of Christianity Judaism and aspects of Buddhism Hinduism and Islam Every chapter expands the argument that if responsiveness to our world is taken seriously if proper and sustainable responses are to be realised then a deeper understanding of creativity and so kenosis is essential This book opens up a way of thinking about creativity and humanity s readiness to be creative It thereby presents a crucial enquiry at the nexus of architecture philosophy and theology for researchers graduate and postgraduate students and practitioners alike

Shamsher Singh, Sabah Siddiqui, 2024-09-30 In the annals of India's history a monumental uprising unfolded in 2020 echoing the resilience and coming together of large sections of its agrarian base. Instigated by the contentious farm laws of 2020 the Farmers Movement burgeoned into a year long saga of protest and perseverance ending only in December 2021 after the passing of the Farm Laws Repeal Bill 2021 by the Indian Parliament. From the initial demand for law repeal to the multifaceted growth of the movement the book traces the journey of the Farmers Movement as each essay dissects the socio-political dynamics, cultural nuances and mass solidarity that underpinned the protests including focused analyses from Delhi, Punjab, Haryana, Uttar Pradesh, Rajasthan, Maharashtra and the Sikh diaspora in the United Kingdom. This anthology chronicles the ebb and flow of a nation's spirit encapsulating the symbiotic relationship between theory and praxis between change and continuity. It serves as a testament to the power of collective resistance and a roadmap for future struggles ensuring that the legacy of the Farmers Movement endures beyond the pages of history. This volume is an interdisciplinary project and will be of interest to scholars from diverse fields such as economics, sociology, public policy, political science, history, political geography, gender studies, cultural studies, international studies, architecture, media studies, psychology and ethnomusicology.

Organic Design in Twentieth-Century Nordic Architecture Erik Champion, 2019-02-18 Organic Design in Twentieth Century Nordic Architecture presents a communicable and useful definition of organic architecture that reaches beyond constraints. The book focuses on the works and writings of architects in Nordic countries such as Sigurd Lewerentz, Jørn Utzon, Sverre Fehn and the Aaltos, Aino Elissa and Alvar among others. It is structured around the ideas of organic design principles that influenced them and allowed their work to evolve from one building to another. Erik Champion argues organic architecture can be viewed as a concerted attempt to thematically unify the built environment through the allegorical expression of ongoing interaction between designer, architectural brief and building as process. With over 140 black and white images this book is an intriguing read for architecture students and professionals alike.

African Identity in Post-Apartheid Public Architecture Jonathan Alfred Noble, 2016-12-05 Since the end of Apartheid there has been a new orientation in South African art and design turning away from the colonial aesthetics to new types of African expression. This book examines some of the fascinating and impressive works of contemporary public architecture that concretise imaginative dialogues with African landscapes, craft and indigenous traditions. Referring to Frantz Fanon's classic study of colonised subjectivity *Black Skin White Masks*, Noble contends that Fanon's metaphors of mask and skin are suggestive for architectural criticism in the context of post-Apartheid public design. Taking South Africa's first democratic election of 1994 as its starting point, the book focuses on projects that were won in architectural competitions. Such competitions are conceived within ideological debates and studying them allows for an examination of the interrelationships between architecture, politics and culture. The book offers insights into these debates through interviews with key parties concerned: architects, competition jurors, politicians, council and city officials, artists and crafters as well as people who are involved in the
