A Great Many Refugees Thomas A. Krainz, *A Land Apart* Flannery Burke, 2017-05-02 Winner Spur Award for Best Contemporary Nonfiction Western Writers of America A Land Apart is not just a cultural history of the modern Southwest it is a complete rethinking and recentering of the key players and primary events marking the Southwest in the twentieth century Historian Flannery Burke emphasizes how indigenous Hispanic and other non white people negotiated their rightful place in the Southwest Readers visit the region s top tourist attractions and find out how they got there listen to the debates of Native people as they sought to establish independence for themselves in the modern United States and ponder the significance of the U S Mexico border in a place that used to be Mexico Burke emphasizes policy over politicians communities over individuals and stories over simple narratives Burke argues that the Southwest s reputation as a region on the margins of the nation has caused many of its problems in the twentieth century She proposes that as they consider the future Americans should view New Mexico and Arizona as close neighbors rather than distant siblings pay attention to the region s history as Mexican and indigenous space bear witness to the area s inequalities and listen to the Southwest s stories Burke explains that two core parts of southwestern history are the development of the nuclear bomb and subsequent uranium mining and she maintains that these are not merely a critical facet in the history of World War II and the militarization of the American West but central to an understanding of the region s energy future its environmental health and southwesterners conception of home Burke masterfully crafts an engaging and accessible history that will interest historians and lay readers alike It is for anyone interested in using the past to understand the present and the future of not only the region but the nation as a whole

Are We Not Foreigners Here? Jeffrey M. Schulze, 2018-04-12 Since its inception the U S Mexico border has invited the creation of cultural economic and political networks that often function in defiance of surrounding nation states It has also produced individual and group identities that are as subversive as they are dynamic In *Are We Not Foreigners Here* Jeffrey M Schulze explores how the U S Mexico border shaped the concepts of nationhood and survival strategies of three Indigenous tribes who live in this borderland the Yaqui Kickapoo and Tohono O odham These tribes have historically fought against nation state interference employing strategies that draw on their transnational orientation to survive and thrive Schulze details the complexities of the tribes claims to nationhood in the context of the border from the nineteenth century to the present He shows that in spreading themselves across two powerful omnipresent nation states these tribes managed to maintain separation from currents of federal Indian policy in both countries at the same time it could also leave them culturally and politically vulnerable especially as surrounding powers stepped up their efforts to control transborder traffic Schulze underlines these tribes efforts to reconcile their commitment to preserving their identities asserting their nationhood and creating transnational links of resistance with an increasingly formidable international boundary

Unflooding Asia the Green Cities Way Zoran Vojinovic, Jingmin Huang, 2014-10-15 A continuing increase in disasters triggered by floods occurs almost daily even though our technological capabilities have grown rapidly and global economic growth per capita has doubled This paradoxical situation proves that our earlier ways of thinking are inadequate and that we must shift our way of thinking and working It has become obvious

that most flood related disasters although commonly referred to as natural disasters are not the result of nature related processes alone Some of the early efforts in dealing with floods and flood related disasters were only concerned with the construction of engineering structures e g levees floodwalls dams embankments storage basins diversions etc without significant consideration of aspects which are nowadays regarded as equally important if not more important There is a great deal of natural social and technological interactions that shape the vulnerability to floods Realizing that flood risk can hardly ever be completely eliminated the traditional flood defence culture has been replaced with the culture of learning how to live under flood risk and how to better respond to it This renders purely engineering solutions inadequate Can the threats of more flood related disasters provide an impetus to shift our mind set towards an approach that favours not only sound technological innovations but one that also addresses the social cultural and wider ecological aspects of dealing with floods In this illustrated book the Asian Development Bank ADB seeks to introduce a holistic thinking in dealing with urban floods by adopting the green cities development approach Green cities development is a holistic approach which promotes multipurpose or multifunctional solutions that are not only technologically and economically efficient but which are also ecologically sustainable and socially just Authors Zoran Vojinovic UNESCO IHE Institute for Water Education Delft The Netherlands and Jingmin Huang Senior Urban Development Specialist Regional and Sustainable Development Department Asian Development Bank
