Americ-Holics Anonymous Will King, 2021-01-27 How does society influence and mold us Is our social moral fabric nothing more than a thin curtain of denial behind which we are actually promoting drugs and alcohol to ourselves Or is addiction an odd peculiarity within an otherwise moral and sane culture Could society itself be

in its fundamental nature addictive If our Western American Judeo Christian society were a person could it be medically diagnosed as an addict Leaving the question of individual addiction aside are we all living in an overall collective addictive environment If the whole of society could like a patient be taken to the doctor s office what symptoms might be observed If we could put the entirety of western civilization on the psychiatrist s couch as one large collective patient might it result in a diagnosis of addiction

Rethinking Parking David Mephram,2023-12-22 For much of the past century we have viewed the issue of parking from the driver s seat It follows that key narratives about parking reaffirm the immediate needs of the driver A consequence of this approach is a failure to understand the significant damage that parking causes to the destination That damage is amplified by cheap easy parking at the expense of place and access outcomes Viewing parking from an urban planning and design perspective highlights different issues and opportunities Five perspectives are offered Place If we gave drivers all the parking they wanted the destination would not be worth visiting Politics Parking is intensely territorial emotional and prone to populism and this is a barrier to strategic and sustainable parking reform Policy Parking tends to be focused on the me here and now needs of the driver at the expense of bigger picture and longer term policy objectives Price Subsidized parking exists behind opaque pricing mechanisms In contrast a transparent accounting of costs is a vehicle for strategic parking reform Professional practice Parking is a significant land use issue located at the juncture of transport and urban planning and design Improving urban parking outcomes requires an integrated and collaborative planning process An alternative view of parking is timely as new technologies and economies fundamentally change everything we understand about parking A potential paradigm shift is in the making Rethinking Parking provides a pathway to a better parking place balance and access to destinations worth visiting It is valuable reading for students and professionals engaged in transport planning urban access and design
