China, State Sovereignty and International Legal Order Phil C.W. Chan, 2015-05-19 China's rise has aroused apprehension that it will revise the current rules of international order to pursue and reflect its power and that in its exercise of State sovereignty it is unlikely to comply with international law This book explores the extent to which China's exercise of State sovereignty since the Opium War has shaped and contributed to the legitimacy and development of international law and the direction in which international legal order in its current form may proceed It examines how international law within a normative institutional framework has moderated China's exercise of State sovereignty and helps mediate differences between China's and other States approaches to State sovereignty such that State sovereignty and international law may be better understood

The Economics of Government Regulation Wang Junhao, 2021-07-06 Regulation is a public policy approach closely related to calculations of the equilibrium of supply and demand and to cost benefit analyses Governments combine a variety of incentives and restrictions on behavior including laws and regulations in order to guide enterprises and smaller

entities within the economy toward pursuing policies in the public interest This book offers an in depth and systematic review of the economic theory of regulation with particular emphasis on the Chinese context The basic concepts cover economic and social regulation regulatory process regulation under asymmetric information and capture theory Drawing on a broad range of cases from across the telecommunications electric power and water sectors since the founding of the People s Republic of China in 1949 the author explores economic regulation in China with reference to natural monopoly investment price level and price structure entry and competition In addition he discusses theories of externalities and asymmetric information which are analyzed in the light of China s environmental and product quality regulation The author argues that the Chinese government has deregulated its economy to a large extent in the past and proposes that the Chinese government will enforce more social regulation in the future Students and scholars of government regulation economics and industrial organization will find this volume to be an essential guide

The South China Sea Arbitration Stefan Talmon, Bing Bing Jia, 2014-11-01 On 22 January 2013 the Republic of the Philippines instituted arbitral proceedings against the People s Republic of China PRC under the United Nations Convention on the Law of the Sea UNCLOS with regard to disputes between the two countries in the South China Sea South China Sea Arbitration On 19 February 2013 the PRC formally expressed its opposition to the institution of proceedings making it clear from the outset that it will not have any part in these arbitral proceedings and that this position will not change It is thus to be expected that over the next year and a half the Tribunal will receive written memorials and hear oral submissions from the Philippines only The Chinese position will go unheard However the Tribunal is under an obligation before making its award to satisfy itself not only that it has jurisdiction over the dispute but also that the claims brought by the Philippines are well founded in fact and law UNCLOS Annex VII Article 9 This book aims to offer a not the Chinese perspective on some of the issues to be decided by the Tribunal and thus to assist the Tribunal in meeting its obligations under the Convention The book does not set out the official position of the Chinese government but is rather to serve as a kind of amicus curiae brief advancing possible legal arguments on behalf of the absent respondent The book does not deal with the merits of the disputes between the Philippines and the PRC but focuses on the questions of jurisdiction admissibility and other objections which the tribunal will have to decide as a preliminary matter The book will show that there are insurmountable preliminary objections to the Tribunal deciding the case on the merits and that the Tribunal would be well advised to refer the dispute back to the parties in order for them to reach a negotiated settlement The book brings together scholars of public international law from mainland China Taiwan and Europe united by a common interest in the law of the sea and disputes in the South China Sea This title is included in Bloomsbury Professional s International Arbitration online service

China's Foreign Policy Contradictions Tim Nicholas Rühlig, 2022 China s rise to great power status is indisputable but can it shape the future international order This question remains widely debated because China s foreign policy is contradictory Contrary to conventional wisdom this book shows that China does not act from a position of strength

but that foreign policy contradictions are the result of the domestic vulnerabilities of the ruling Chinese Communist Party. Providing exceptional insights into the considerations behind the opaque institutional structures of Chinese foreign policymaking and decision making, it shows that China will not provide a model for a new international system but could undermine the existing order.
