Peptides James P. Tam, Pravin T.P. Kaumaya, 2006-04-11 The Fifteen American Peptide Symposium 15APS was held in Nashville Tennessee on June 14 19 1997 This biennial meeting was jointly sponsored by the American Peptide Society and Vanderbilt University The attendance of 1 081 participants from 37 countries was lower than the two previously held Symposia However the number of participating countries was the largest Thus it was gratifying to see that this meeting retained both its international flavor and participant loyalty at a time when there are many more symposia held each year on similar subjects The scientific program thanks to the insights and efforts of the Program Committee as well as Dr Peter Schiller the President of the American Peptide Society was extraordinarily rich diverse and exciting It was comprised of 124 oral and 550 poster presentations Three prominent format changes were installed First the Symposium started on Saturday instead of Sunday Second the program opened on Saturday afternoon with a Mini symposium by the Young Investigators to give them an early start and attention Finally 40 short and definitive reports were given in two parallel sessions The expanded format permitted an unprecedented number of lectures and enabled wider participation by the attending delegates

**Peptide Biosynthesis** Akina Hoshino, Iris Lindberg, 2012-01-12 The prohormone convertases PC 1 3 and 2 are calcium activated eukaryotic subtilisins with low pH optima which accomplish the limited proteolysis of peptide hormone precursors within neurons and endocrine cells In this lecture we review the biochemistry regulation and roles of PC1 3 and 2 in disease with an emphasis on the work published in the last 10 years In the 20 years since their discovery a great deal has been learned about their localization and cellular functions Both PCs share the same four domains the propeptides perform important roles in controlling activation and targeting the catalytic domains confer specificity with PC1 3 possessing a more restricted binding pocket than that of PC2 the P domain is required for expression and contributes to enzymatic properties and the C terminal tail assists in proper routing to granules PC1 3 but not PC2 exists in full length and C terminally truncated forms that exhibit different biochemical properties Both enzymes associate with binding proteins proSAAS is thought to modulate precursor cleavage by PC1 3 while co expression of 7B2 is obligatory for the formation of active PC2 Finally new studies have revealed an increasingly important role for PC1 3 polymorphisms and mutations in glucose homeostasis and obesity Table of Contents General Introduction to the Prohormone Convertases Prohormone Convertase 1 3 Prohormone
