Population Atlas Of China

Richard T. Wang

Population Atlas Of China:

The Population Atlas of China, 1987 The Population Atlas is based on the 1982 census of the People's Republic of China and constitutes the official and definitive cartographic portrayal of one quarter of the world's population. The 1982 census was the third census since the founding of the People's Republic and involved over 5 million people working some 500 000 man years. Incorporating the results of the census, the Atlas covers population distribution and change, nationalities, sex and age, marriage and fertility, the level of education and occupations. Hong Kong and Taiwan are included in so far as comparable data are available. 80% of the mapping and data processing was done by computer. National Geographic Atlas of China National Geographic Society (U.S.), 2008 Bursting with full colour maps and graphics, this essential atlas provides in depth geographical coverage as it highlights the dramatic cultural and economic changes now occurring in China. National Geographic's renowned cartographers have mapped the entire country, all its administrative regions and their cities, towns and transportation networks to create a complete and meticulously researched panorama of the world's fastest growing economy and most populous nation. In addition to newly compiled political and physical maps, colourful thematic presentations, post information on trade, energy, natural resources, environment, military strength, religion, ways of life, communications and more. An exhaustive place name index helps readers navigate to thousands of specific locations. State of the art satellite imagery and mosaics at the highest resolution ever published by National Geographic reveal incredible variety and amazing details of China's sweeping physical landscapes. Ten major cities chosen from various regions throughout China receive close up treatment with maps laying out each metropolitan area and quick read fact boxes listing local climate, time zone, population and more. The profile of Beijing, the capital, pinpoints sites of the 2008 Summer Olympics. Also charted extensively is Shanghai, host of the 2010 World's Fair. China's first expected to draw 70 million visitors. Since the nation's turn toward openness in the late 1970s, tourism has become a major growth industry in this land of bustling cities, spectacular vistas, ethnic diversity and cultural and historical marvels. One of the 21 thematic topics focuses on tourism with a map locating popular attractions such as the Great Wall, the Terra cotta Warriors, Zhulong Nature Reserve, the Silk Road, the Imperial Palace and Hong Kong's Star Ferry. A history section covers China's primary dynasties and then with a time line highlights the events of the twentieth century to the present. Charts, graphs and photographs complete the visual coverage of China today, with expert commentaries adding insight on topics that range from the workings of China's government to the lifestyles of its people to the global implications of its stunning emergence as a major player on the world scene. *The Population Atlas of China* Chung-kuo Jen K'ou Ti T'u Chi China, 1987 The Population and Manpower of China United States.
