Population Change in Europe, the Middle-East and North Africa Koenraad Matthijs, Karel Neels, Christiane Timmerman, Jacques Haers, 2016-12-05 Current demographic trends raise new questions challenges and controversies Comparing demographic trends in Europe and the NAME region North Africa and the Middle East this book demonstrates how population change interacts with changing economic landscapes social distinctions and political realities A variety of drivers contribute to demographic change in the various regions and countries considered such as family policies economic realities the impact of educational differentials and the attitudes towards marriage On the macro level the new trends are restructuring the age composition of populations and are reshaping the life courses of individuals and families In turn the impact demographic forces have on the organisation of labour markets on fiscal policies on the care of the elderly on migration flows and on political changes can be quite radical Chapter 1 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license https://s3.us-west-2.amazonaws.com/tandfbis-rt-files/docs/Open+Access+Chapters/9781472439543_oachapter1.pdf

[Population Change as Related to Long-term Cycles in Residential Construction in the United States](#) Thomas C. Marcin, 1981 Major demographic changes have occurred in the U.S. that will significantly affect future demand for housing and economic growth Net household formation is at a peak now because of the baby boom of the last generation Current job and housing demands by young adults will continue for 10 years and then reverse as the impact of the current declining birth rate is felt This paper analyzes the potential effects of population growth rate and age structure on potential housing demand based on three alternate assumptions for population

and economic growth Author *The Impact Of Population Change On Business Activity In Rural America* Kenneth M Johnson, 2019-07-11 Dr Johnson moves beyond the existing literature on rural urban population shifts during the past forty years to examine the effects of those shifts on the business infrastructure that supplies goods and services to rural areas in the United States First establishing a historical demographic context to serve as a backdrop he provides a detailed longitudinal treatment on the linkage between population change and the rural commercial infrastructure as well as timely information on the impact of the recent rural population turnaround on business Some of his findings based on the latest data available refute earlier expectations that a decrease in population necessarily leads to a decline in the local business community
