Population And The World Bank Implications From Eight Case Studies:

Population and the World Bank World Bank. Operations Evaluation Department, 1994 **A Primer of Population Dynamics** Krishnan Namboodiri, 2013-06-29 A Primer of Population Dynamics introduces to the basics of population studies Author Krishnan Namboodiri utilizes a question and answer format that explores topics such as population theories and conceptual schemes demographic data mortality fertility migration family and household food production and the environment and much more Questions are accompanied by detailed explanations as well as references for additional information An extensive index and glossary allow for easy retrieval of information This introductory textbook is written for students studying demography population sociology and public health *The World Bank's Role in Human Resource Development in Sub-Saharan Africa* Ronald Gene Ridker, 1994 World Bank Discussion Paper 244 Although many studies have analyzed the gender gap in primary and secondary education in developing countries this study is one of the few that analyzes the gap at the tertiary or university level The authors track the patterns in women s access to and achievement in higher education including student enrollment and access to faculty and administrative positions The study also identifies successful strategies and measures for reducing the gender gap Two issues are examined in this paper Part I reviews how women have fared in the wake of expanded tertiary enrollments over the past three decades Despite evidence proving the importance of women s access to higher education for economic growth a pervasive gap remains especially in Sub Saharan Africa the Middle East and South Asia The second part examines the World Bank s experience in projects designed to improve women s experience in higher education The extent and severity of constraints varied across regions Results are limited and many projects are still in progress The findings suggest that countries with low per capita income levels and difficult social settings for women may have the greatest barriers to female participation Even where social constraints are less severe the programs for improving female education must respond to the demands of the labor market **World Bank** Anne C. M. Salda, 1995 Reproductive Rights and Wrongs Betsy Hartmann, 1995 With a new introduction this fully revised edition of a feminist classic reveals the dangers of contemporary population control tactics especially as they affect women in developing countries **The Struggle for Accountability** Jonathan A. Fox, L. David Brown, 1998-08-19 After a history of funding environmentally costly megaprojects the World Bank now claims that it is trying to become a leading force for sustainable development For more than a decade nongovernmental organizations NGOs and grassroots movements have formed transnational coalitions to reform the World Bank and the governments that it funds The Struggle for Accountability assesses the efforts of these groups to make the World Bank more publicly accountable The book is organized into four parts Part I describes the NGOs and grassroots movements that are the book s central focus Part II presents case studies of four projects that provoked the emergence of transnational advocacy coalitions Indonesia s Kedung Ombo dam the Mt Apo geothermal plant in the Philippines Brazil s Planaforo Amazon development project and the remarkable campaign of Ecuador

s indigenous people to influence national economic policy that led to their participation in the design of a development loan

Part III looks at the origins and politics of reform in four areas of broader World Bank policy the rights of indigenous peoples involuntary resettlement water resources and the World Bank's institutional reforms that are supposed to encourage public accountability In the last section the editors discuss issues of accountability within transnational coalitions and assess the impact of advocacy campaigns on World Bank projects and policies Contributors L David Brown Jane G Covey Jonathan A Fox Andrew Gray Margaret E Keck Deborah Moore Antoinette Royo Augustinus Rumansara Leonard Sklar Kay Treakle Lori Udall David A Wirth

The World Bank's Experience with Post-conflict Reconstruction, 1998-01-01 Clearing landmines rehabilitating and integrating of excombatants rebuilding the infrastructure coordinating aid sources these are just some of the issues confronting the Bank in post conflict reconstruction The explosion of civil conflicts in the post Cold War world has tested the World Bank's ability to address unprecedented devastation of human and social capital This study covers post conflict reconstruction in nine countries assessing relevant recent Bank experience It also presents case studies for ongoing and future operations which analyze 1 the Bank's main strengths or comparative advantages 2 its partnership with other donors international organizations and NGOs 3 its role in reconstruction strategy and damage and needs assessment 4 its role in rebuilding the economy and institutions of governance 5 its management of resources and processes 6 implications for monitoring and evaluation

Historical Dictionary of the World Bank Sarah Tenney, Anne C. Salda, 2013-10-30 When it was founded back in 1944 no one could possibly have foreseen how the World Bank known more formally as the International Bank for Reconstruction and Development IBRD would flourish Today with 188 members it is by far the largest lender for projects in agriculture health infrastructure and many other fields in developing countries around the world with a budget of billions of dollars and a staff of more than 9 000 and its advice is usually heeded by both the developing countries which borrow from it and the advanced ones which contribute This second edition of the Historical Dictionary of the World Bank shows the substantial progress the Bank has made this mainly through the dictionary section with concise entries on its component institutions related organizations its achievements in various fields some of the major projects and member countries and its various presidents The introduction explains how the Bank works while the chronology traces the major events over nearly 70 years Meanwhile the list of acronyms reminds us just who the main players are And the bibliography directs readers to useful internal documentation and outside studies

Evaluating Health Projects Susan Stout, 1997-01-01 This book explores the wave of decentralization that has swept through Latin America and the projected institutional changes within the governments in the region Although it notes the ways in which decentralization implies a critique of past governing patterns the emphasis is on such potential consequences of governmental change as the strengthening of democratic participation in government and the improvement of local public service The book draws upon institutional experiments carried out at the state level to examine which decentralization strategies work best in Latin America It is

organized around three major requirements for the success of decentralization Establishing the national fiscal framework Moving government closer to the people Improving municipal service delivery Tables illustrate the shift of revenues and expenditures from central authorities to intermediate levels of government *The World Bank and Irrigation* William I. Jones, 1995-01-01 Annotation This book provides an independent and comprehensive review of World Bank irrigation lending and policy between 1948 and 1993 The Bank s role in irrigation lending has been large more than 30 billion in current U S dollars spread over some 600 projects Only 200 projects have been in place long enough to be assessed The overall performance record is good but there is room for improvement The report finds that there are still pervasive problems in maintenance and operation Operating chaos prevails in most large canal systems in the humid tropics In drier areas drainage is the biggest environmental problem associated with irrigation The author argues for upgrading existing systems improving service involving irrigators and saving water where it is scarce
