Population Of Modern China:

The Population of Modern China Dudley L. Poston Jr., David Yaukey, 2013-11-11 Student interested in world populations and demography inevitably need to know China. As the most populous country of the world, China occupies a unique position in the world population system. How its population is shaped by the intricate interplays among factors such as its political ideology and institutions, economic reality, government policies, sociocultural traditions, and ethnic divergence represents at once a fascinating and challenging arena for investigation and analysis. Yet for much of the 20th century, while population studies have developed into a mature science, precise information and sophisticated analysis about the Chinese population had largely remained either lacking or inaccessible. First because of the absence of systematic databases due to almost uninterrupted strife and wars, and later because the society was closed to the outside observers for about three decades since 1949. Since the end of the Cultural Revolution, things have dramatically changed. China has embarked on an ambitious reform program where modernization became the utmost goal of societal mobilization. China could no longer afford to rely on imprecise census or survey information for population-related studies and policy planning, nor to remaining closed to the outside world. Both the gathering of more precise information and access to such information have dramatically increased in the 1980s. Systematic observations, analyses, and reporting about the Chinese population have surfaced in the population literature around the globe.

Population in Modern China Da Chen, 1981 [Population in Modern China](#) T. Ch'en, 1946 *Population in modern China* Ta Ch'en, 1974 **Population in modern China** Ta Chen, 1946 [Modern China](#) Geeta Kochhar, 2019-02-12 This book looks at the transition of modern Chinese society in terms of its culture and literature. Since the economic reforms and open door policy in 1978, the Chinese society has undergone a drastic transformation. It is headed towards becoming an ultra-modern, advanced society and a world superpower. Among the pillars of great change are the advances in technology and communication that have reshaped Chinese society. This volume explores China's march towards modernity in the 21st century as defined by its own terms. It discusses China's social structure, ageing population, gender stratification, marriages, cultural identity, cosmopolitanism, its history of communism, law, economic reforms, financial institutions, and challenges of the global markets. The book sheds light on Chinese literature and media and brings out various facets of social changes across time. With its topical debates and issues, this volume will be useful to scholars and researchers of Chinese studies, East Asian studies, geopolitics, area studies, international relations, politics, and foreign policy, along with think tanks and those in media and journalism.
