Population Perspectives On Organizations Acta Universitatis Upsaliensis:

Career Choice in Management and Entrepreneurship Mustafa F. Özbilgin, Ayala Malach-Pines, 2009-01-01 Presents an assessment of early influences on the career choice of managers and entrepreneurs their attitudes at the start of their careers as students and in their later employment experiences This book also examines the influence of an MBA education on the later work and life experiences of managers and entrepreneurs **Management of Knowledge-Intensive Companies** Mats Alvesson, 2011-07-13 No detailed description available for Management of Knowledge Intensive Companies

Organizational Behaviour Stephen J Perkins, Raisa Arvinen-Muondo, 2013-01-03 There is a large body of shared knowledge between the study of Organizational Behaviour and Human Resource Management but despite the crossover they are often treated as very distinct disciplines Written by a team of experts across both fields Organizational Behaviour bridges the gap between OB and HRM with an emphasis on inter cultural and cross cultural perspectives of organizational development talent management and leadership Through a critical analysis of existing literature and case studies the contributors cover topics such as corporate governance ethical business practices employee morale and motivation performance management corporate politics and conflict resolution workplace diversity creativity and change management all within the framework of current global employment standards and best practices *Charismatic Capitalism* Nicole Woolsey Biggart, 2014-12-10 Tupperware Home Parties Shaklee Corporation Amway Mary Kay Cosmetics theirs is an approach to business that violates many of the basic tenets of modern American commerce Yet these direct selling organizations fashioned by charismatic leaders and built upon devoted armies of door to door representatives have grown to constitute an 8 5 billion a year industry and provide a livelihood for more than 5 million workers the vast majority of them women The first full scale study of this industry Charismatic Capitalism revises the standard contention that the rationalization of social institutions is an inevitable consequence of advanced capitalism Nicole Woolsey Biggart argues instead that less rational organizations built on social networks may actually be more economically viable Business Marketing: An Interaction and Network Perspective Kristian K. Möller, David T. Wilson, 1995-11-30 Changing Views of Business Marketing This book aims to provide an in depth understanding of long term busi in industrial markets During the late 1980s our view ness relationships on business marketing changed remarkably From a single transaction oriented market mechanism based description of marketing and purchas ing we are moving into domestic and international buyer seller relation ships In academic terms we are experiencing a broadening of the para digms that describe how companies interact This change in focus has its roots in the recognition that business marketing is frequently characterized by long term interaction coopera tion and coalitions between participant firms The forces of quality total cost management and the need to decrease response times in new prod uct service development all are combining to accelerate the trend to wards strategic relationships In increasingly global markets different forms of strategic alliances provide ways of joining forces in attempts to

reach goals beyond any single firm's resources. Also, our way of seeing the corporate environment is changing. Instead of the traditional view of markets or industries as constituted by independent companies operating mainly through market competition, we are starting to realize that markets can be more realistically defined and described as networks of interlinked organizations. The network view offers a highly promising tool for describing and analyzing the rapidly integrating global marketplace. For instance, strategic alliances can be seen as moves of establishing positions in a network or as ways of changing the whole network.

Elgar Companion to Neo-Schumpeterian Economics Horst Hanusch, Andreas Pyka, 2007. The *Elgar Companion to Neo-Schumpeterian Economics* is a cutting edge collection of specially commissioned contributions highlighting not only the broad scope but also the common ground between all branches of this prolific and fast developing field of economics. For 25 years economists have been investigating industrial dynamics under the heading of neo-Schumpeterian economics which has itself become a mature and widely acknowledged discipline in the fields of innovation, knowledge growth and development economics. The *Elgar Companion to Neo-Schumpeterian Economics* surveys the achievements of the most visible scholars in this area. The contributions to the Companion give both a brief survey on the various fields of neo-Schumpeterian economics as well as insights into recent research at the scientific frontiers. The book also illustrates the potential of neo-Schumpeterian economics to overcome its so far self-imposed restriction to the domains of technology driven industry dynamics and to become a comprehensive approach in economics suited for the analysis of development processes in all economic domains. Integrating both the public sector and financial markets, the book focusses on the co-evolutionary processes between the different domains. As a roadmap for the development of a comprehensive neo-Schumpeterian theory, the Companion will be an invaluable source of reference for researchers in the fields of industrial dynamics and economic growth and academics and scholars of economics generally. PhD students will find the Companion an indispensable general introduction to the field of neo-Schumpeterian economics. It will also appeal to politicians and consultants engaged in national and international policy as the Companion deals with the highly important and ever topical phenomena of economic development.

Management and Organizations in Transitional China Yanlong Zhang, Lisa Keister, 2016-05-12. China's 30 year market transition and its integration into the world economy provide a unique opportunity for exploring the nature of large scale economic and political transformation and the mechanisms underlying organizational behavior during such a transition. *Management and Organizations in Transitional China* explores how managers and firms cope with transition related challenges by adapting to, manipulating or even creating the complex institutional environment. This book examines the way transitional institutions shape individual decisions and organizational strategies, the mechanisms that promote the diffusion of innovative management practices and

economic policies and the formation and evolution of interfirm networks Based on a comprehensive review of the studies on market transition this book investigates how firms manage their relationship with important stakeholders in the environment It highlights the importance of network based strategies for institutionally less advantaged actors like private firms foreign entrants and entrepreneurs to establish legitimacy gain institutional support and mobilize financial resources Moreover this book studies the mechanisms that facilitate the adoption of innovative management practices and economic policies in the transitional context comparing the mainstream diffusion theories and evaluating the relative potency of the diffusion drivers Furthermore Management and Organizations in Transitional China provides empirical analyses using longitudinal data of alliance formation network evolution and the effect of both alliance formation and network evolution on firm decision making and performance Combining theory data analysis and rich contextual description to provide a comprehensive understanding of the organizational transition process this book will appeal to scholars and practitioners in general management
