Fragments of a Lost Homeland Armen T. Marsoobian, 2015-03-13 The Armenian world was shattered by the 1915 genocide Not only were thousands of lives lost but families were displaced and the narrative threads that connected them to their own past and homelands were forever severed Many have been left with only fragments of their family histories a story of survival passed on by a grandparent who made it through the cataclysm or if lucky an old photograph of a distant silent ancestor By contrast the Dildilian family chose to speak Two generations gave voice to their experience in lengthy written memoirs in diaries and letters and most unusually in photographs and drawings Their descendant Armen T Marsoobian uses all these resources to tell their story and in doing so brings to life the pivotal and often violent moments in Armenian and Ottoman history from the massacres of the late nineteenth century to the final expulsions in the 1920s during the Turkish War of Independence Unlike most Armenians the Dildilians were allowed to convert to Islam and stayed behind while their friends colleagues and other family members perished in the death marches of 1915 1916 Their remarkable story is one of survival against the overwhelming odds and survival in the face of peril

Australia & Israel Shahar Burla, Dashiell Lawrence, 2015-06-01 Australia and the State of Israel have maintained a cordial if at times ambiguous relationship The two countries are geographically isolated strategic economic and cultural interests lie increasingly with Asia for one and with the US and the EU for the other But for all that divides the two states there is also much they share Australia played an important role in the Jewish state's establishment in 1948 and is home to the most Zionist centered Jewish diaspora globally Jewishness for most Australian Jews has been shaped and defined by engagement with and support for Israel At the heart of this engagement is a small but thriving Israeli community within the larger multicultural Australia Australia and Israel A Diasporic Cultural and Political relationship draws attention to the important historical and contemporary nexus between this diaspora and its imagined homeland The collection also considers the ways in which these

two states mobilise national myths and share environmental challenges In recent time relations between the two states have been tested by the illegal use of Australian passports in 2010 the mysterious death of dual national Ben Zygier and growing disquiet within the ranks of the Australian Labor Party and the Australian Greens over Israel's handling of the Israel Palestinian conflict One prominent world wide issue is the Palestinian BDS Boycotts Divestments and Sanctions movement which has attracted sympathy and support that has brought about substantive differences of opinion regarding its legitimacy within the Jewish Australian community These issues demonstrate the multifaceted and complex picture of two very different nations that nevertheless share an abiding connection

Upwave John Montgomery,2016-02-17 Countering the many claims that the best days of capitalism are over following the economic meltdown of 2008 onwards this book provocatively argues that a new golden age of capitalism or upwave began around 2002 and despite the unstable markets in the western world of the past few years this upwave will produce previously unseen levels of wealth creation during the next twenty years Basing this theory on the commercialisation of new technologies and the growth of new markets the author claims that these positive trends are key to economic recovery in the US UK and Europe It argues that the most serious problem facing some countries in the west is government debt and that macroeconomic policy is of limited use in flexible and adaptive economies where innovation entrepreneurship and private investment should be encouraged in a range of cities and city regions This highly original book

will interest those concerned with national economies nation states and urban policy The Oxford Group and the Emergence of Animal Rights Robert Garner, Yewande Okuleye, 2020-10-20 Animal rights is now a concept that has achieved wide name recognition Vegetarianism and even veganism is now commonplace representing a massive transformation in public attitudes Fifty years ago the concept of animal rights was almost unheard of and the animal protection movement lay dormant Even vegetarians were regarded as at best cranks and at worst dangerous critics of the social order Yet the late 1960s and early 1970s were a formative time for the contemporary animal rights movement One of the most important and influential intellectual moments for animal rights occurred at this time at Oxford University among like minded scholars who would become known as the Oxford Group The Oxford Group and the Emergence of Animal Rights is about this little known group a loose friendship group of primarily postgraduate philosophy students who attended the University of Oxford for a short period of time in the late 1960s The book traces the early development of the Oxford Group and its influence on animal rights theory and activism It also serves as a case study of how the emergence of important work and the development of new ideas can be explained as well as how the intellectual development of participants in a friendship group is influenced by their participation in a creative community For example would Peter Singer have written his landmark book Animal Liberation or anything about animal ethics without being exposed to the other members of the Oxford Group How would the discipline of animal ethics differ if the group had not produced their edited collection of articles Animals Men and Morals Drawing on previously unpublished correspondence among and interviews with the surviving Oxford Group members Robert Garner and Yewande Okuleye explore the social and political milieu in which the group formed to understand how such intellectual movements coalesce
