Is it solely about treating sports injuries? Should it only be concerned with elite sport? This book provides a history of the relationship between sport medicine and health from the mid 19th century to today. It combines the sub-disciplines of the history of medicine and the history of sport to give a balanced analysis of the role of medicine in sport and how this has evolved over the past two centuries. In an age where sports medicine plays an increasingly prominent role in both elite and recreational sport, this book provides a timely and clear analysis of its rise and purpose.

Cycling Peter Cox, 2019-03-15 *Cycling: A Sociology of Mobility* explores cycling as a sociological phenomenon. Drawing on extensive ethnographic fieldwork, it considers the interaction of materials, competencies and meanings that comprise a variety of cycling practices. What might appear at first to be self-evident actions are shown to be constructed through the interplay of numerous social and political forces. Using a theoretical framework from mobilities studies, its central themes respond to the question of what it is about cycling that provokes so much interest and passion, both positive and negative. Individual chapters consider how cycling has appeared as theme and illustration in social theory, as well as the legacies of these theorizations. The book expands on the image of cycling practices as the product of an assemblage of technology, rider and environment. Riding spaces as material technologies are found to be as important as the machinery of the cycle, and a distinction is made between routes and rides to help interpret aspects of journey making. Ideas of both affordance and script are used to explore how elements interact in performance to create sensory and experiential scapes. Consideration is also given to the changing identities of cycling practices in historical and geographical perspective. The book adds to existing research by extending the theorization of cycling mobilities. It engages with both current and past debates on the place of cycling in mobility systems and the problems of researching, analyzing and communicating ephemeral mobile experiences.

French Cycling Hugh Dauncey, 2012-01-01 *French Cycling: A Social and Cultural History* aims to provide a balanced and detailed analytical survey of the complex leisure activity, sport and industry that is cycling in France. Identifying key events, practices, stakeholders and institutions in the history of French cycling, the volume presents an interdisciplinary analysis of how cycling has been significant in French society and culture since the late Nineteenth century. Cycling as Leisure is considered through reference to the adoption of the bicycle as an instrument of tourism and emancipation by women in the 1880s, for example, or by study of the development in the 1990s of long distance tourist cycle routes. Cycling as Sport and its attendant dimensions of amateurism, professionalism, national identity, the body and doping and other issues is investigated through study of the history of the Tour de France, the track racing organised at the Velodrome d'hiver in Paris in the 1920s and 1930s, and other emblematic events. Cycling as Industry and economic activity is considered through an assessment of how cycling firms have contributed to technological innovation at various junctures in France's economic

development Cycling and the Media is investigated through analysis of how cyclesport has contributed to developments in the French press in early decades but also to new trends in television and radio coverage of sports events Based on a very wide range of primary and secondary sources the volume aims to present in clear language an explanation of the varied significance of cycling in France over the last hundred years

The War on Drugs in Sport Vanessa

McDermott, 2015-10-23 This book is an innovative and compelling work that develops a modified moral panic model illustrated by the drugs in sport debate Drawing on Max Weber's work on moral authority and legitimacy McDermott argues that doping scandals create a crisis of legitimacy for sport governing bodies and other elite groups This crisis leads to a moral panic where the issue at stake for elite groups is perceptions of their organizational legitimacy The book highlights the role of the media as a site where claims to legitimacy are made and contested contributing to the social construction of a moral panic The book explores the way regulatory responses in this case anti doping policies in sport reflect the interests of elite groups and the impact of those responses on individuals or folk devils The War on Drugs in Sport makes a key contribution to moral panic theory by adapting Goode and Ben Yehuda's moral panic model to capture the diversity of interests and complex relationships between elite groups The difference between this book and others in the field is its application of a new theoretical perspective supported by well researched empirical evidence

The Monuments Peter

Cossins, 2014-03-13 Peter Cossins is an engaging writer whose conversational style makes this an effortless yet interesting read The cosy tone delivers a great deal with a good balance of history and anecdotes If you wish to explore cycling beyond the Grand Tours this is the book Carlton Kirby An awe inspiring history of the five most legendary classic races in world cycling The Tour de France may provide the most obvious fame and glory but it is cycling's one day tests that the professional riders really prize Toughest longest and dirtiest of all are the so called Monuments the five legendary races that are the sport's equivalent of golf's majors or the grand slams in tennis Milan Sanremo the Tour of Flanders Paris Roubaix Liège Bastogne Liège and the Tour of Lombardy date back more than a century and each of them is an anomaly in modern day sport the cycling equivalent of the Monaco Grand Prix Time has changed them to a degree but they remain as brutally testing as they ever have been They provide the sport's outstanding one day performers the likes of Philippe Gilbert Fabian Cancellara Mark Cavendish Tom Boonen Peter Sagan and Thor Hushovd with a chance to measure themselves against each other and their predecessors in the most challenging tests in world cycling From the bone shattering bowler hat cobbles of the Paris Roubaix rumoured to be Bradley Wiggins' next challenge to the insanely steep hellingen in the Tour of Flanders each race is as unique as the riders who push themselves through extreme exhaustion to win them and enter their epic history Over the course of a century only Rik Van Looy Eddy Merckx and Roger De Vlaeminck have won all five races Yet victory in a single edition of a Monument guarantees a rider lasting fame For some that one victory has even more cachet than success in a grand tour Each of the Monuments has a fascinating history featuring tales of the finest and largest

as it does charting its origins to the founding of the modern Olympic Games From interwar notions of sporting purity to the postwar stimulant crisis what seemed an easily resolvable problem soon became an impossible challenge as the pharmacology improved the policy system stuttered and Cold War politics allowed doping to flourish The late twentieth century saw the creation of the World Anti Doping Agency but has the intensity of these global measures led to unintended harms From the cyclist Tommy Simpson who died in 1967 on Mont Ventoux with amphetamines in his jersey to Team Russia's expulsion from the 2018 Winter Olympics Doping A Sporting History is a gripping provocative account that ultimately proposes a new approach one for the inclusion and protection of athletes themselves
