Putting The Corporate Board To Work:

Putting the Corporate Board to Work Courtney C. Brown,1976 *Social Strategy & Corporate Structure* Neil W. Chamberlain,2007-09-10 This new work by Neil W Chamberlain will be of great importance to the business community and to all those charged with defining the role large corporations play in the affairs of society Social Strategy and Corporate Structure is an objective indepth examination of the organizational requirements of a social role for large scale business The role Neil Chamberlain presents is one of heroic dimensions the political choice of goals the strategic allocation of resources and the tactical operations of the mechanisms of production While there has been much discussion of corporate social responsibility few have investigated the ways its structure will have to change if the corporation is to pursue a strategy that is both economic and social This timely book integrates a large number of issues involving corporate activities and governance that go directly to the heart of this problem In step by step detail Chamberlain analyzes the organizational imperatives of this new age of social responsibility the composition and functions of boards of directors and the relation of their duties to a broad system of national planning the internal social audit changes in the characteristics of corporate social planning and proposals for restructuring ultimate corporate authority either through public or outside directors In addition he examines the potential relevance of federal chartering of corporations and the effects of international economic interdependence on the development of a new corporate social strategy This book is not a detailed blueprint for change Rather it presents a thorough systematic study of available courses of action for improvement based on the principle that conventional notions of corporate independence will have to be modified for any social strategy to work And while not everyone will agree with Neil Chamberlain few can afford to ignore his provocative insights into what corporations must do to function effectively in a changed social environment Catalog of Copyright Entries. Work Robert Zemsky,2009-08-11 Making Reform Work is a practical narrative of ideas that begins by describing who is
 saying what about American higher education who s angry who s disappointed and why Most of the pleas for changing
 American colleges and universities that originate outside the academy are lamentations on a small number of too often
 repeated themes The critique from within the academy focuses on issues principally involving money and the power of the
 market to change colleges and universities Sandwiched between these perspectives is a public that still has faith in an
 enterprise that it really doesn t understand Robert Zemsky one of a select group of scholars who participated in Secretary of
 Education Margaret Spellings s 2005 Commission on the Future of Higher Education signed off on the commission s report
 with reluctance In Making Reform Work he presents the ideas he believes should have come from that group to forge a
 practical agenda for change Zemsky argues that improving higher education will require enlisting faculty leadership on the
 one hand and on the other a strategy for changing the higher education system writ large Directing his attention from what
 can t be done to what can be done Zemsky provides numerous suggestions These include a renewed effort to help students
 performance in high schools and a stronger focus on the science of active learning not just teaching methods He concludes
 by suggesting a series of dislodging events for example making a three year baccalaureate the standard undergraduate
 degree congressional rethinking of student aid in the wake of the loan scandal and a change in the rules governing
 endowments that could break the gridlock that today holds higher education reform captive Making Reform Work offers

three rules for successful college and university transformation don't vilify don't play games and come to the table with a well thought out strategy rather than a sharply worded lamentation
