**Life Ahead** Jiddu Krishnamurti, 2010-10-19 *Life Ahead* presents lessons that move far beyond the traditional forms of education taught in most schools and colleges Drawn from transcripts of talks given to Indian students the book covers a wide range of universal topics In short accessible chapters Krishnamurti explores the danger of competition the value of solitude the need to understand both the conscious and the unconscious mind and the critical difference between concentration and attention and between knowledge and learning Krishnamurti exposes the roots of fear and eradicates deeply entrenched habits of tradition limitation and prejudice The life he holds forth requires a complete change of thought even a revolution one that begins not with theory and ideation he writes but with a radical transformation in the mind itself He explains how such transformation occurs only through an education that concentrates on the total development of the human being an education carefully described in this simple yet powerful book **Truth** John

D. Caputo, 2013-09-26 In the first in a new series of easily digestible commute length books of original philosophy renowned thinker John D Caputo explores the many notions of truth and what it really means Riding to work in the morning has become commonplace We ride everywhere Physicians and public health officials plead with us to get out and walk to get some exercise People used to live within walking distance to the fields in which they worked or they worked in shops attached to their homes Now we ride to work and nearly everywhere else Which may seem an innocent enough point and certainly not one on which we require instruction from the philosophers But truth be told it has in fact precipitated a crisis in our understanding of truth Arguing that our transportation technologies are not merely transient phenomena but the vehicle for an important metaphor about postmodernism or even constitutive of postmodernism John D Caputo explores the problems posited by the way in which science ethics politics art and religion all claim to offer us the truth defending throughout a postmodern or hermeneutic theory of truth and posits his own surprising theory of the many notions of truth John D Caputo is a specialist in contemporary hermeneutics and deconstruction with a special interest in religion in the postmodern condition The Thomas J Watson Professor of Religion Emeritus at Syracuse University and the David R Cook Professor of Philosophy Emeritus at Villanova University he has spearheaded an idea he calls weak theology **Gadamer and the**

**Question of the Divine** Walter Lammi, 2011-10-27 Gadamer and the Question of the Divine uncovers a neglected side of Gadamer's thought namely his life long concern with the question of the divine Not only is this an issue of fundamental importance to philosophical hermeneutics but it also contributes to what Gadamer considered to be the most urgent task of our time a conceptual dialogue among religions New grounds for toleration among communities must be found and Gadamer's study of the divine provides both a model and a starting place for doing so In setting forth a conceptual narrative for global dialogue about religious transcendence Gadamer is the pre eminent twentieth century philosopher of the divine Gadamer's study of the divine is an application of philosophical hermeneutics and phenomenological in its descriptions of temporality and the experience of art Walter Lammi shows how Gadamer provides us with a richly textured study of the divine that finds its bearings in Heidegger and the Greeks and suggests a path to questions of cosmology temporality and religious experience

**The New Conservatism** Jürgen Habermas, 2018-03-13 Jürgen Habermas is well known for his scholarly writings on the theoretical foundations of the human sciences The New Conservatism brings to light another side of Habermas's work showing him to be an incisive commentator on a wide range of contemporary themes The 1980s have been a crucial decade in the political life of Western democracies in general and of the Federal Republic of Germany in particular The transformations that accompanied a shift from 13 years of Social democratic rule in Germany to government by the conservative Christian Democrats are captured in this series of insightful often passionate political and cultural commentaries The central theme uniting the essays is the German problem of coming to terms within the past a problem that has important implications outside Germany as well Of particular note are the essays on what has come to be known as the Historians Debate Habermas's attack on the revisionist German historians who have been trying to trivialize and normalize the history of the Nazi period and his defence of the need for a realistic and discriminating approach to the Nazi period and its legacy Habermas also takes up the recent debate concerning Martin Heidegger's involvement with Nazism and the rise of the neoconservative movement in Europe and America In particular the essay on The New Obscurity combines Habermas's analysis of the problems of the welfare state with his suggestions for avenues open to utopian impulses today

**The Passions of the Soul in the Metamorphosis of Becoming** Anna-Teresa Tymieniecka, 2013-03-09 Over the millennia philosophy has sought the ultimate understanding of the full human horizon of existence as well as of human destiny and the ultimate sense of it All The innumerable attempts to grasp the answers to these questions each taking its own approach and having its own preconceptions have engendered a range of different philosophical approaches one so broad that seemingly unbridgeable rifts impede possible cross fertilizing communication And yet the themes of all of them e.g the immeasurable cosmos life the individual being bearing life the human person within his or her world and his or her longings to transcend that world the human mind its pragmatic cognitive tools creative speculative pursuits remain constants The logos they all share is one It is not that no vicarious sharing of intuitive glimpses by the proponents of the varied doctrines

and methods in question occurs The history of philosophy is in fact marked by the juxtaposing of theories and approaches having different trajectories and by the mixing of insights the crossing of borders etc However what is greatly needed is in depth comparison of the various doctrines and a reflection on the contrasting opposing clashing perspectives that seeks foundations for all of them in the human creative condition in that microcosm that extends its tentacles toward the two great infinities the external infinity of the cosmos and the internal infinity of transcending destiny A Call To Truth: My Search
