The Puzzle Instinct Marcel Danesi, 2002-06-19 One of the most famous anagrams of all time was constructed in the Middle Ages The unknown author contrived it as a Latin dialogue between Pilate and Jesus Jesus answer to Pilate s question What is truth is phrased as an ingenious anagram of the letters of that very question Pilate Quid est veritas What is truth Jesus Est virqui adest It is the man before you The origin of anagrams is shrouded in mystery One thing is clear however in the ancient world they were thought to contain hidden messages from the gods Legend has it that even Alexander the Great 356 323 b c believed in their prophetic power from Chapter Two The most obvious explanation for the popularity of puzzles is that they provide a form of constructive entertainment But in *The Puzzle Instinct* Marcel Danesi contends that the fascination with puzzles throughout the ages suggests something much more profound Puzzles serve a deeply embedded need in people to make sense of things Emerging at the same time in human history as myth magic and the occult arts the puzzle instinct he claims led to discoveries in mathematics and science as well as revolutions in philosophical thought Puzzles fill an existential void by providing small scale experiences of the large scale questions that Life poses The puzzle instinct is arguably as intrinsic to human nature as is humor language art music and all the other creative faculties that distinguish humanity from all other species

**Voter Turnout and the Dynamics of Electoral Competition in Established Democracies Since 1945** Mark N. Franklin, 2004-04-19 Voting is a habit People learn the habit of voting or not based on experience in their first few elections Elections that do not stimulate high turnout among young adults leave a footprint of low turnout in the age structure of the electorate as many individuals who were new at those elections fail to vote at subsequent elections Elections that stimulate high turnout leave a high turnout footprint So a country s turnout history provides a baseline for current turnout that is largely set except for young adults This baseline shifts as older generations leave the electorate and as changes in political and institutional circumstances affect the turnout of new generations Among the changes that have affected turnout in

recent years the lowering of the voting age in most established democracies has been particularly important in creating a low turnout footprint that has grown with each election
