Philosophy of Language and Webs of Information Heimur Geirsson, 2013 The nature of propositions and the cognitive value of names have been the focal point of philosophy of language for the last few decades. The advocates of the causal reference theory have favored the view that the semantic contents of proper names are their referents. However, Frege's puzzle about the different cognitive value of coreferential names has made this identification seem impossible. Geirsson provides a detailed overview of the debate to date and then develops a novel account that explains our reluctance even when we know about the relevant identity to substitute coreferential names in both simple sentences and belief contexts while nevertheless accepting the view that the semantic content of names is their referents. The account focuses on subjects organizing information in webs: a name can then access and elicit information from a given web. Geirsson proceeds to extend the account of information to non-referring names but they have long provided a serious challenge to the causal reference theorist.

The Principles and Problems of Philosophy Roy Wood Sellars, 1926

Gottlob Frege: Frege's philosophy of thought and language Michael Beaney, Erich H. Reck, 2005 This collection brings together recent scholarship on Frege including new translations of German material which is made available to Anglophone scholars for the first time.

The Puzzle of Existence Tyrone Goldschmidt, 2014-02-05 This groundbreaking volume investigates the most fundamental question of all: Why is there something rather than nothing? The question is explored from diverse and radical perspectives: religious, naturalistic, platonistic and skeptical. Does science answer the question? Or does theology? Does everything need an explanation? Or can there be brute inexplicable facts? Could there have been nothing whatsoever? Or is there any being that

could not have failed to exist Is the question meaningful after all The volume advances cutting edge debates in metaphysics philosophy of cosmology and philosophy of religion and will intrigue and challenge readers interested in any of these subjects
