Entries on individual writers assess the place of that writer within the development of the novel form explaining why and in exactly what ways that writer is important. Similarly an entry on an individual novel discusses the importance of that novel not only from analyzing the particular innovations that novel has introduced and the ways in which it has influenced the subsequent course of the genre. A wide range of topic entries explore the history, criticism, theory, production, dissemination and reception of the novel. A very important component of the Encyclopedia of the Novel is its long surveys of development of the novel in various regions of the world.

*The Oxford Handbook of Arab Novelistic Traditions* Wail S. Hassan, 2017-08-01

The Oxford Handbook of Arab Novelistic Traditions is the most comprehensive treatment of the subject to date. In scope the book encompasses the genesis of the Arabic novel in the second half of the nineteenth century and its development to the present in every Arabic speaking country and in Arab immigrant destinations on six continents. Editor Wail S. Hassan and his contributors describe a novelistic phenomenon which has pre-modern roots stretching centuries back within the Arabic cultural tradition and branching outward geographically and linguistically to every Arab country and to Arab writing in many languages around the world. The first of three innovative dimensions of this Handbook consists of examining the ways in which the Arabic novel emerged out of a syncretic merger between Arabic and European forms and techniques rather than being a simple importation of the latter and rejection of the former as early critics of the Arabic novel claimed. The second involves mapping the novel geographically as it took root in every Arab country developing into often distinct though overlapping and interconnected local traditions. Finally the Handbook concerns the multilingual character of the novel in the Arab world and by Arab immigrants and their descendants around the world both in Arabic and in at least a dozen other languages. The Oxford Handbook of Arab Novelistic Traditions reflects the current status of research in the broad field of Arab novelistic traditions and signals toward new directions of inquiry.

*Nationalism and Liberal Thought in the Arab East* Christoph Schumann, 2010-02-25

This book is concerned with the relationship between nationalism and liberal thought in the Arab East during the first half of the twentieth century. It examines this formative period through reformist Islam, Arab secularism and Arab literature and shows that liberal ideas were not entirely eclipsed by nationalism with the outbreak of the Second World War.
