## **Qualitative Theory Of Dynamical Systems The Role Of Stability Preserving Mappings:**

**Qualitative Theory of Dynamical Systems** Anthony N. Michel, Kaining Wang, Bo Hu, 2001 Introduces the concept of stability preserving mappings to establish a qualitative equivalence between the two dynamical systems the comparison system and the system to be studied The book sets out to provide insight into dynamical systems unobtainable by usual treatments of the subject electronics mechanical civil aerospace and industrial engineers control theorists physicists computer scientists chemists biologists econometricians operations researchers and upper level undergraduate and graduate students in these disciplines student price which is available on request *Qualitative Theory of Dynamical Systems* Anthony Michel, Anthony Wang, Bo Hu, Zuhair Nashed, Earl Taft, 2001-01-04 Illuminates the most important results of the Lyapunov and Lagrange stability theory for a general class of dynamical systems by developing topics in a metric space independantly of equations inequalities or inclusions Applies the general theory to specific classes of equations Presents new and expanded material on the stability analysis of hybrid dynamical systems and dynamical systems with discontinuous dynamics *Qualitative Theory of Dynamical Systems* Anthony N. Michel, Kaining Wang, 1995 Employing a general definition of dynamical systems applicable to finite and infinite dimensional systems including systems that cannot be characterized by equations inequalities and inclusions this important reference text the only book of its kind available introduces the concept of stability preserving mappings to establish a qualitative equivalence between two dynamical systems the comparison system and the system to be studied **Stability of Dynamical Systems** Anthony N. Michel, Ling Hou, Derong Liu, 2015-03-30 The second edition of this textbook provides a single source for the analysis of system models represented by continuous time and discrete time finite dimensional and infinite dimensional and continuous and discontinuous dynamical systems For these system models it presents results which comprise the classical Lyapunov stability theory involving monotonic Lyapunov functions as well as corresponding contemporary stability results involving non monotonic Lyapunov functions Specific examples from several diverse areas are given to demonstrate the applicability of the developed theory to many important classes of systems including digital control systems nonlinear regulator systems pulse width modulated feedback control systems and artificial neural networks The authors cover the following four general topics Representation and modeling of dynamical systems of the types described above Presentation of Lyapunov and Lagrange stability theory for dynamical systems defined on general metric spaces involving monotonic and non monotonic Lyapunov functions Specialization of this stability theory to finite dimensional dynamical systems Specialization of this stability theory to infinite dimensional dynamical systems Replete with examples and requiring only a basic knowledge of linear algebra analysis and differential equations this book can be used as a textbook for graduate courses in stability theory of dynamical systems It may also serve as a self study reference for graduate students researchers and practitioners in applied mathematics engineering computer science economics and the physical and life sciences Review of the First Edition The

authors have done an excellent job maintaining the rigor of the presentation and in providing standalone statements for diverse types of systems This is a very interesting book which complements the existing literature It is clearly written and difficult concepts are illustrated by means of good examples Alessandro Astolfi IEEE Control Systems Magazine February 2009

Antsaklis, 2012-12-06 It is with great pleasure that I offer my reflections on Professor Anthony N Michel's retirement from the University of Notre Dame I have known Tony since 1984 when he joined the University of Notre Dame's faculty as Chair of the Department of Electrical Engineering Tony has had a long and outstanding career As a researcher he has made important contributions in several areas of systems theory and control theory especially stability analysis of large scale dynamical systems The numerous awards he received from the professional societies particularly the Institute of Electrical and Electronics Engineers IEEE are a testament to his accomplishments in research He received the IEEE Control Systems Society's Best Transactions Paper Award 1978 and the IEEE Circuits and Systems Society's Guillemin Cauer Prize Paper Award 1984 and Myril B Reed Outstanding Paper Award 1993 among others In addition he was a Fulbright Scholar 1992 and received the Alexander von Humboldt Forschungspreis Alexander von Humboldt Research Award for Senior U S Scientists from the German government 1997 To date he has written eight books and published over 150 archival journal papers Tony is also an effective administrator who inspires high academic standards

**Computer Aided Systems Theory - EUROCAST 2001** Roberto Moreno-Díaz, Bruno Buchberger, Jose-Luis Freire, 2003-08-14 The concept of CAST as Computer Aided Systems Theory was introduced by F Pichler in the late 1980s to include those computer theoretical and practical developments as tools to solve problems in System Science It was considered as the third component the other two being CAD and CAM necessary to build the path from Computer and Systems Sciences to practical developments in Science and Engineering The University of Linz organized the first CAST workshop in April 1988 which demonstrated the acceptance of the concepts by the scientific and technical community Next the University of Las Palmas de Gran Canaria joined the University of Linz to organize the first international meeting on CAST Las Palmas February 1989 under the name EUROCAST 89 This was a very successful gathering of systems theorists computer scientists and engineers from most European countries North America and Japan It was agreed that EUROCAST international conferences would be organized every two years alternating between Las Palmas de Gran Canaria and a continental European location Thus successive EUROCAST meetings have taken place in Krems 1991 Las Palmas 1993 Innsbruck 1995 Las Palmas 1997 and Vienna 1999 in addition to an extra European CAST Conference in Ottawa in 1994

**Computer Aided Systems Theory - EUROCAST 2001** Roberto Moreno-Díaz, Bruno Buchberger, 2001-11-28 This book constitutes the thoroughly refereed post proceedings of the 8th International Workshop on Computer Aided Systems Theory EUROCAST 2001 held in Las Palmas de Gran Canaria Spain in February 2001 The 48 revised full papers presented together with two invited papers were carefully selected during two rounds of reviewing and

revision The book offers topical sections on computer aided systems theory mathematical and logical formalisms information and decision complexity neural like computation automation and control computer algebra and automated theorem proving and functional programming and lambda calculus

**Discontinuous Systems** Yury V. Orlov, 2008-10-28 Discontinuous Systems develops nonsmooth stability analysis and discontinuous control synthesis based on novel modeling of discontinuous dynamic systems operating under uncertain conditions While being primarily a research monograph devoted to the theory of discontinuous dynamic systems no background in discontinuous systems is required such systems are introduced in the book at the appropriate conceptual level Being developed for discontinuous systems the theory is successfully applied to their subclasses variable structure and impulsive systems as well as to finite and infinite dimensional systems such as distributed parameter and time delay systems The presentation concentrates on algorithms rather than on technical implementation although theoretical results are illustrated by electromechanical applications These specific applications complete the book and together with the introductory theoretical constituents bring some elements of the tutorial to the text
