Quality And Education:

Quality Education Rao, 2007 **Excellence and Quality in Education** Joseph I. Zajda, M. K. Bacchus, Nick Kach, 1995
This book explores some of the central issues in the definition and evaluation of excellence and quality in education Using comparative and international methodology the contributors from around the world highlight and discuss some of the key factors of the quality debate at national institutional and classroom levels Excellence and Quality in Education offers an invaluable insight into the current polemics surrounding the technocratic push for quality in education *The Quality Education Challenge* Carolyn J. Downey, Larry E. Frase, Jeffrey J. Peters, 1994-04-29 Attempts to implement W Edwards Deming's Total Quality Management TQM principles in education and transform school systems into world class quality learning environments have proved somewhat disappointing This book asserts that educators need a way to translate the ideas about corporate quality for adaptation and use in schools The missing link is offered in the description and discussion of Total Quality Education TQE presented in this document The book first clarifies what quality is and who the customers and suppliers in education are It then presents a Quality Fit Framework which describes how quality can be infused into school systems This framework is built on three basic leverage points shared purpose structure and dynamic relationships that form the basis for applying 18 common core premises of quality to school organizations Chapter 1 addresses the issue of the international educational challenge and serves as a primer for defining quality and various quality premises Chapters 2 4 define each of the three leverage points and present strategies for carrying them out in the school system Chapter 5 presents suggestions for making significant differences in the lives of today's youth Sixty two figures are included Finally chapter 6 examines the criticisms of TQM in education LMI **Quality education** Muchativugwa L. Hove, Martha Matashu, 2021-11-30 This book investigates the intersections between education social justice gendered violence and human rights in South African schools and universities The rich and multifarious tapestry of scholarship and literature emanating from South African classrooms provides a fascinating lens through which we can understand the complex consequences of the economies of education social justice imperatives gendered violence in the lives of women and children and marginalised communities The scholarship in the book challenges readers to imagine alternative futures predicated on the transformational capacity of a democratic South Africa Contributors to this volume examine the many ways in which social justice and gendered violence mirror express project and articulate the larger phenomenon of human rights violations in Africa and how in turn the discourse of human rights informs the ways in which we articulate interrogate conceptualise enact and interpret quality education The book also wrestles with the linguistic contradictions and ambiguities in the articulation of quality education in public and private spaces This book is essential reading for scholars seeking a solid grounding in exploring quality education the instances of epistemic disobedience the political implications of place and power and human rights in theory and practice Quality Education in India P.K. and inclusion of various traditional expectations This book explores notions of quality as understood within various systems of national formal and nonformal education Also it considers the tensions that arise with the introduction of new standardized notions of quality in relation to international measures and educational reforms in developing countries In all cases specific national issues and concerns compete with global agendas Challenges to quality that are given particular attention in the book chapters include changing definitions of quality high expectations for education and issues with implementation and the introduction of English as a means to achieve quality in a globalizing world Special attention is also given to possible actions that support a more equitable education without ignoring the requisite of quality The final chapter suggests three models choices for seeking higher quality and guiding the educational future of nations **Supervision for Quality Education in Science** Uhlman S.
