Quality In Public Services Managers Choices:

Quality in Public Services Lucy Gaster, 1995 This work examines a variety of approaches to quality definition implementation and measurement The author provides a framework to enable public service managers to develop and integrate ideas about quality in ways which are relevant to their own day to

Total Quality Management In The Public Sector Morgan, Colin, Murgatroyd, Stephen, 1994-02-01 Total Quality Management TQM is a set of concepts tools and applications which has been so successful in manufacturing industry that we are now witnessing experimentation in the transference of Total Quality Management to the public sector provision of government health and education in North America Europe and elsewhere TQM is starting to set a new paradigm for management approaches in the public sector and not for profit enterprises All key public service managers should at least need to know the basics of TQM its possibilities and limitations for the public sector and particularly the types of applications which could work for them For all public sector managers this book provides a clear understanding of the key concepts of TQM a critical understanding of their relevance to the public sector empirical evidence of TQM applications in government health and education and exploration of the public sector TQM possibilities yet to be realized It draws throughout on case examples from Britain Canada the USA and continental Europe which illustrate the application of TQM to the public sector

Improving the Quality of East and West European Public Services Elke Lffler, 2017-11-30 This volume provides a comprehensive overview of current reforms in public sector quality management in Eastern Europe Comparisons are made with trends in Western European countries to draw out the lessons emerging from current developments including e governance Case studies from twelve countries and five comparative and conceptual studies identify how quality is put into practice how the level of quality is assessed through quality accreditation systems and how e government and citizen involvement may help to improve public service quality The findings make essential reading for academics and students in public policy and public administration who are interested in modernization of the public sector from an international perspective It also provides helpful guidance for reformers who want to try new approaches to improving the quality of public services

Developing Quality in Personal Social Services Adalbert Evers, Riitta Haverinen, Kai Leichsenring, Gerald Wistow, 2019-05-23 First published in 1997 this volume is about the challenge of introducing business originated concepts of quality assurance personal social services are currently confronted with all over Europe Undoubtedly the new orientation towards a more business like approach in social welfare settings will raise professionalism client orientation and controlling instead of mere inspection There is evidence however that the specificities of personal social services are not always taken into account if it comes to introducing market values and mechanisms Due to this development it becomes essential to promote more adequate criteria for quality standards in the very field of personal social services The challenge is to maintain a certain standard of service provision while at the same time reconsidering the preconditions for defining quality This will imply the search for a consensus between allegedly

diverging approaches i.e. between their different basic concepts, aims and standards. Given the social and economic context within which these developments are taking place, the focus of the contributions is on their critical assessment in different European countries. An overview is given about national developments in the areas of care for older persons and other social services. The contributors from Austria, Belgium, Denmark, Finland, Germany, Italy, the Netherlands, Norway, Sweden, and the UK look at how and by whom quality is defined and what challenges the actors of the traditionally mixed economy of personal social services are meeting. Empirical evidence about user involvement and satisfaction is given, but also theoretical reasoning about the impact of business approaches on a public good. Thus, the book tries to fill an important gap in practice research and policy making concerning personal social services and quality issues.

Co-Production and Public Service Management Victor Pestoff, 2018-10-03

This volume compiles a dozen essays by one of the most prolific proponents of co-production as a solution for many of the challenges facing public services and democratic governance at the outset of the 21st Century. Co-production is considered a partnership between citizens and public service providers that is essential for meeting a growing number of social challenges, since neither the government nor citizens can solve them on their own. These challenges include, among other things, improving the efficiency and effectiveness of public services in times of financial strain, increasing the legitimacy of the public sector after decades of questioning its ability, with the spread of New Public Management, promoting social integration and cultural pluralism in increasingly diverse societies when millions of refugees and immigrants are on the move, tackling the threat of burgeoning populism following the rise of anti-immigrant and anti-global parties in many countries in recent years, and finally finding viable solutions for meeting the growing needs of aging populations in many parts of the world. This volume addresses issues related to the successful development and implementation of a policy shift toward greater citizen participation in the design and delivery of the services they depend on in their daily lives and greater citizen involvement in resolving these tenacious problems, facilitated by the active support of governments across the globe. Moreover, it explores participatory public service management that empowers the front-line staff providing public services. Together with users, citizens, they can insure the democratic governance of public service provision.

Managing Performance in the Public Sector Gerrit Van der Wal, 2004

Monitoring and ensuring effective, efficient, and economic use of resources in the public sector is addressed in this critical analysis. The importance of tracking performance for good governance is considered, as are the benefits of designing a departmental and human performance management system. Particular attention is paid to the difficult task of measuring worker performance in the public sector, where a wide array of unquantifiable variables must be examined. Various performance models, such as the Excellence Foundation and the Balance Scorecard, provide an invaluable resource of concepts, considerations, and challenges for improving public sector performance.
