Quality Of Life Research In Chinese Western And Global Contexts:

Quality-of-Life Research in Chinese, Western and Global Contexts Daniel T.L. Shek,Ying Keung Chan,Paul S.N.

Lee,2005-06-08 The majority of studies on the quality of life have been conducted in Western contexts and are based on Western participants Comparatively speaking there are only a few studies that have been conducted in different Chinese contexts Also there are fewer QOL studies based on children and adolescents or studies that examine the relationship between QOL and economic disadvantage In addition more research is needed to address the methodological issues related to the assessment of quality of life This volume is a constructive response to the challenges described above It is the first book to cover research in Chinese Western and global contexts in a single volume It is a ground breaking volume in which Chinese studies on the quality of life are collected The book includes papers addressing family QOL quality of life in adolescents experiencing economic disadvantage and methodological issues in the assessment of QOL It is written by researchers working in a variety of disciplines

Special Issue Quality of Life Research in Chinese, Western and Global Contexts Daniel T. L. Shek,2005

Psychoactive Drug Abuse in Hong Kong Yuet Wah Cheung,Nicole Wai-ting Cheung,2017-08-31 This book studies young people s use of psychoactive drugs and its social and psychological correlates in Hong Kong Specifically it focuses on how life satisfaction may affect drug use among a sample of psychoactive drug users in Hong Kong The book addresses the dearth of research on the role of young people s life satisfaction in their drug abuse and engagement in other risk behaviors in Hong Kong It also examines how changes in the drug scene from heroin addiction to psychoactive party drug use since the late 1990s has necessitated a deeper exploration of the subculture of young people which shapes their attitudes and behaviors regarding how they structure their lives and how they perceive the risks of drug use in the context of the global trend of normalization of recreational drug use Readers will benefit from the results of a rigorous analysis of a unique set of longitudinal data that reveals the factors influencing drug use among young psychoactive drug users academic implications of the findings for social science theory and research on young people s drug use and practical implications of the findings for prevention and intervention services for young people in Hong Kong and other Asian societies

Handbook of Social Indicators and Quality of Life Research Kenneth C. Land,Alex C. Michalos,M. Joseph Sirgy,2011-11-25 The aim of the Handbook of Social Indicators and Quality of Life Research is to create an overview of the field of Quality of Life QOL studies in the early years of the 21st century that can be updated and improved upon as the field evolves and the century unfolds Social indicators are statistical time series used to monitor the social system helping to identify changes and to guide intervention to alter the course of social change Examples include unemployment rates crime rates estimates of life expectancy health status indices school enrollment rates average achievement scores election voting rates and measures of subjective well being such as satisfaction with life as a whole and with specific domains or aspects of life This book provides a review of the historical development of the field including the history of QOL in medicine and mental

health as well as the research related to quality of work life QWL programs It discusses several of QOL main concepts happiness positive psychology and subjective wellbeing Relations between spirituality and religiousness and QOL are examined as are the effects of educational attainment on QOL and marketing and the associations with economic growth The book goes on to investigate methodological approaches and issues that should be considered in measuring and analysing quality of life from a quantitative perspective The final chapters are dedicated to research on elements of QOL in a broad range of countries and populations

Barometers of Quality of Life Around the Globe Valerie Møller, Denis

Huschka, Alex C. Michalos, 2008-09-16 Quality of life QOL research has made great strides since the social indicator movement started as a scientific enterprise in the 1960s Following the lead of pioneers in North America and Europe social scientists in other regions of the world have adopted and refined social data systems or barometers to monitor progress in enhancing the welfare and well being of citizens A distinctive feature of these barometers is that they measure both individual and societal quality of life While not overlooking the more basic needs and material standards of living the barometers also inform on issues of individual freedoms and choices and constraints on citizen empowerment that enhance and depress quality of life Designed to capture nuances in local definitions of the good life regional barometers are unique expressions of the obstacles facing different societies in their quest to achieve the good life Scholars of public policy as well as policy makers will find inspiration from reviews of innovative initiatives to monitor contemporary quality of life in six regions of the world spanning South America the Arctic Europe Africa Asia and Australia

The Human Quest for Meaning Paul T. P. Wong, 2013-06-19

The first edition of *The Human Quest for Meaning* was a major publication on the empirical research of meaning in life and its vital role in well being resilience and psychotherapy This new edition continues that quest and seeks to answer the questions what is the meaning of life How do we explain what constitutes meaningful relationships work and living The answers as the eminent scholars and practitioners who contributed to this text find are neither simple nor straightforward While seeking to clarify subjective vs objective meaning in 21 new and 7 revised chapters the authors also address the differences in cultural contexts and identify 8 different sources of meaning as well as at least 6 different stages in the process of the search for meaning They also address different perspectives including positive psychology self determination integrative narrative and relational perspectives to ensure that readers obtain the most thorough information possible Mental health practitioners will find the numerous meaning centered interventions such as the PURE and ABCDE methods highly useful in their own work with facilitating healing and personal growth in their clients *The Human Quest for Meaning* represents a bold new vision for the future of meaning oriented research and applications No one seeking to truly understand the human condition should be without it

Qualitative Indicators of Labour Standards David

Kucera, 2007-03-11 Recent years have witnessed a rapidly growing interest in the use and construction of qualitative indicators of labour standards Qualitative indicators while generally having numerical values are based on such methods as

grading by experts the coding of legislation and the coding of other textual sources addressing violations of a more de facto nature Measuring compliance with labour standards is an undertaking intrinsically fraught with difficulty For there are a number of possible sources of measurement error both random and non random that are unique to such indicators on top of those that affect qualitative and quantitative indicators alike The growing use of qualitative indicators of labour standards thus raises a number of questions about comparative methods of construction as well as the appropriateness of particular methods for particular applications This volume results from a seminar that was organized to address these and related questions Encyclopedia Of The Global Economy A Guide For Students And Researchers David E. Purcell,Janet

Haddock-Fraser,2023-01-12 This Handbook illustrates that universities per se and higher education in general are essential to catalyze and action the transformative change needed for sustainability and delivery of the Sustainable Development Goals Part One shows how sustainability can be adopted as a driver of change within higher education institutions HEIs as they react and respond to influencing factors outside the academy Part Two examines how a university working with and for

sustainability can influence effect and amplify change beyond the institution working with and through others International contributors explore regional national and international perspectives presenting a variety of critically assessed accounts case studies that reflect different local and national contexts institutional archetypes and academic missions Frameworks of sustainability led transformation are illustrated at the level of the institution executive administrative organization culture place based anchor and student in various countries including Aruba Belgium Brazil Canada Hong Kong Japan Lebanon Nepal New Zealand Nigeria South Africa Spain Uganda United Kingdom and the United States of America The book concludes with a manifesto for change and a call to action It identifies that the sustainability journey of a HEI is influenced by context and place with mission leadership and strategy playing a vital role and change agency by students a key ingredient Recognizing the patience and resolve to effect change communication dialogue and inclusion were central to community building and partnership

Regulating Cannabis DR Todd Subritzky, 2021-07-23 A 5 year investigation of the implementation of the world's first fully regulated cannabis market for pleasure in Colorado Kind words for *Regulating Cannabis* This book clearly demonstrates authority in the field of international drug policy and draws predominantly on the latest evidence in doing so It is a substantial contribution to an emerging policy issue with a plethora of new knowledge displayed throughout Overall I found this to be a vital addition to the canon of knowledge regarding cannabis policy change

Dr Mark Monaghan Head of the Department of Social Policy Sociology and Criminology University of Birmingham The author has broadened the understanding of cannabis regulation when it comes to conflicts between consumer protection private profit and public health He has successfully applied and enriched several theoretical concepts in the context of cannabis legalization especially when it comes to the elephant in the room the wellness potential of cannabis on legal markets

Vendula Belackova PhD Drug Policy Researcher Adjunct Senior Lecturer at the Social Policy Research Centre University of New South Wales Contents at a glance At a time when cannabis legalisation is spreading across an increasing number of jurisdictions globally this book cuts across the noise and presents a factual account of issues faced by regulators in the real world context of Colorado It can be read as an evidence based handbook for regulators and should be a first port of call for anyone interested in the legalisation of cannabis In January 2014 Colorado implemented a commercial cannabis market for pleasure the first jurisdiction globally to implement a regulated adult use cannabis supply chain from seed to sale It was reported as an historic occasion that presaged a grand social and economic experiment in drug legalisation Including analysis of hundreds of pages of government documents almost 1000 media articles and interviews in the field with over 30 senior government officials industry executives and front line public health representatives this book is the definitive account of real world cannabis policy implementation The cannabis academic public health literature is examined prodigiously including its potential for harm and benefit together with alternative regulatory approaches The book also features a number of papers published in academic journals based on the PhD research of the author The commodification of cannabis vs the

craft approach together with the entanglement of the medical and recreational markets are two of many topical themes discussed in detail Multiple recommendations relevant for other jurisdictions considering the legalisation of cannabis are presented Recognising the limitations of harm reduction approaches that cannot conceptually conceive beneficial aspects of cannabis consumption a new framework the spectrum of wellness is proposed as an alternative in Appendix 1 of the book

Health and Happiness from Meaningful Work Søren Ventegodt, Joav Merrick, 2009 Happiness at work your quality of life and sometimes your life depends on it Work is an important part of the life of the modern man as it always has been but work has become more complicated than before Today what we do is often done as a part of a large organisation The work is often abstract manipulation of matter or information and the value created by the single member of the organisation has become increasingly difficult to measure Organisations have become increasingly responsible for not only the physical work environment but also for the mental working environment and factors like stress and sexual harassment are becoming more and more regulated by company rules and culture The health of the employees has become a major financial interest of the company as only healthy employees and leaders can perform optimally Often the companies have health insurance for their people Today employees and leaders also expect work to provide their life with meaning and stimulating experiences and developing challenges Scholarly knowledge is substituted with experiential learning in a developing and dynamic environment Society is developing fast and only companies with modern well oriented and culturally integrated employees

can win the competition by offering costumers clients or patients the best products and services A strong association between quality of life development of personal character self realisation development of talents and skills physical and mental health meaning of life sense of coherence and similar core concepts of modern medical and psychosocial sciences have in many studies now been strongly associated with work satisfaction joy on the job and similar concepts The scientific challenge we have taken upon our shoulders is to put the whole messy and chaotic area in order and create a formula according to which the actual integrated status of worker can be calculated We have decided to call the integrated concept of all above mentioned dimensions for working life quality similar to the well known global quality of life concept in medicine and social sciences We are proud to present in the present book a mathematical formula from which the created value of an employee or leader can be known if only the working life quality is known We also provide a questionnaire for measuring the quality of working life based on a theory of quality of working life We have in a study on a random sample of the Danish population found a strong statistical association between the measured quality of working life and health We started the research in quality of working life in 1994 and the first version of the QWL theory was ready in 1996 In 1997 it was empirically tested in a study involving 1 500 persons and 30 companies After adjusting the questionnaire and analysis of the data we further improved our understanding to the level that we are happy to present in this book based on a number of published scientific papers
