Planning Quality Project Management of (EMR/EHR) Software Products Richard Chamberlain, 2017-11-10 When hospitals began implementing their electronic medical records electronic health records systems EMR HER the pharmaceutical companies that were conducting clinical trials at those hospitals wanted to sue the data from those systems instead of having the hospitals enter the data in their EHR systems and also in the study data entry system However the FDA regulations would require that the hospital systems be validated The hospitals and the companies developing the systems argued that was over regulation HIMSS published their Developer Code of Conduct where they said instead they would use Quality Management techniques This book covers how to use Quality Management ISO 9001 to develop computer systems specifically EMR systems It gives a basic introduction to how to implement computer systems It also covers the topic of compliance because the hospitals are required to comply with regulations other than FDS regulations The book also discusses the topics of risk management and conducting audits both of which are part of ISO 9001 quality management of computer systems The book is designed to give the reader an introduction to the things you have to do when implementing a computer system that has to satisfy some standards and where the accuracy of the information could impact the accuracy of a person s medical treatment
