Quality In Child Care:

What is Quality Child Care? Bettye M. Caldwell, Asa G. Hilliard, 1985 Quality in Child Care Deborah A. Phillips, 1987

Evaluating the Quality of Family Day Care Ed. D. P. Burns Bellamy, 2001-10 Based on the research and experience of Dr Bellamy this definitive reference work months in the making is one of the most complete and authoritative evaluations of early care and education made available to the public As welfare reforms put more mothers back to work and off public assistance the need for quality child care in the new millennium will reach an all time high Cities throughout the country are facing the ultimate question How does the government help families become self sufficient and productive without jeopardizing quality care and development of the children This book provides a critical look at welfare reforms and at families who struggle to comply with policy guidelines without compromising the care and development of their young children Here in a warm and jargon free style a single work offers families all the practical information needed to select the best quality in child care for their young children Educators and child care officials will find in this work a reservoir of information designed for excellence in early care and education Policymakers will find this work a priceless source in shaping welfare reforms

Assessing the Validity of the Qualistar Early Learning Quality Rating and Improvement System as a Tool for Improving Child-Care Quality Gail L. Zellman, Michal Perlman, Vi-Nhuan Le, Claude Messan Setodji, 2008-06-26 As a result of the generally low quality of child care in the United States quality rating and improvement systems QRISs are proliferating in the child care arena This study examines the QRIS developed by Qualistar Early Learning a nonprofit organization based in Colorado evaluating how reliable the system's components are whether the QRIS process helped providers to improve and whether and how much children benefit from such improvement *Understanding Quality in Child Care* Sharmeen Charania, 2015 Definitions of quality child care are subjective depending on who is defining quality and constructions of quality remain a contested issue in the early childhood field There are multiple ways of defining quality child care most of which are from the perspectives of researchers policymakers and professionals Few studies of child care quality take into consideration parents perspectives of what quality child care means to them and what they deem as important for the wellbeing of their children Ceglowski and Davis 2004 Duncan et al 2004 Harrist et al 2007 and Liu et al 2004 This study compared parent perspectives to criteria for assessing child care used in Quality First a statewide quality improvement and rating system for providers of center based or home based early care and education to better understand the gaps drawing from ecological theory and discuss the consequences of these different perspectives This study utilized a comparative qualitative analysis of ways in which parents and state agencies view determinants of child care quality The data for this study were collected from interview responses to open ended questions on a larger mixed method study with parents of children under the age of 6 from the central Arizona area The quality indicators used by Quality First included the Infant Toddler Environment Rating Scale ITERS R Early Childhood Environment Rating Scale ECERS R Family Child Care

Environment Rating Scale FCCERS R and the Classroom Assessment Scoring System CLASS which were analyzed and compared to parent descriptions of quality factors in child care. The findings of this study contribute to the discussion of ways in which parents' perspectives are similar and different to that of quality rating scales in this case those used by Quality First and how the gap may be contributing to unintended consequences. In the study I noticed that parents were more inclined toward affect qualities as quality indicators whereas the Quality First had more structural qualities as quality indicators. This led to the addressing of the need to bridge this gap to have a more comprehensive understanding of quality child care to meet different needs as identified by parents and professionals.

The States of Child Care Sara Gable, 2014 This accessible up to date account of the chronic issues plaguing child care reform offers viable solutions drawn from a model state child care system in the state of North Carolina. Original data illustrates the complex landscape of U S child care as well as the ambiguous relationship society has with the statistic that 64% of women with children under six are employed and in need of reliable high quality care of their young children.

By a Thread Marcy Whitebook, Laura Sakai, 2004

Demand for child care services has grown steadily over the last few decades due to demographic trends public policies newly discovered links between brain development and early environments and the number of parents entering the labor market for reasons such as welfare reform. As a result most U S children under five spend time on a regular basis each week in nonparental care. Despite the growing demand and the increased recognition of the importance of early childhood development the child care industry suffers from high turnover among both staff and leadership thereby imperiling the overall quality of care provided by child care centers.

In *By a Thread* How Child Care Centers Hold On to Teachers How Teachers Build Lasting Careers Marcy Whitebook and Laura Sakai examine how child care programs and their staff subsist in a field characterized by low pay low status and high turnover and what the impacts of these factors are on the quality of child care provided. Their study is based on an in depth survey of 75 mid size relatively high quality child care centers located in an economically thriving region. They collected data on salaries training and educational background for all teaching staff employed at the centers at three points in time 1994 1996 and 2000. These data provide a detailed picture of the entire teaching workforce at the 75 centers in 2000 and allow a comparison of the workforce in that year to those in 1994 and 1996. This inside look paints a disturbing picture of a dedicated yet poorly paid high turnover workforce. Part I of the book focuses on staff departures and center quality. In it Whitebook and Sakai relate the types and magnitude of turnover occurring among teachers at child care centers to the level of quality provided there. They present empirical evidence on the correlation between center quality and staff stability as well as the perspectives of teachers and directors in their survey who reflect on

the challenge of attaining and maintaining high quality care In Part ii Whitebook and Sakai rely on in depth quantitative evidence to examine the experience of child care employment They point out interesting relationships between the characteristics of the child care workforce and those who have chosen to leave stay or join on They then discuss work and family decisions that impact child care workers career decisions including the rewards listed by workers as reasons they remain employed in child care The authors conclude with three policy recommendations that echo the suggestions made to them by the teaching staff and directors interviewed in their survey They recommend 1 expanding the focus of k 12 education reforms to include preschool years 2 creating national legislation that encourages state and local investments to improve compensation for child care workers and 3 considering whether child care workers might strengthen their hand when it comes to negotiating compensation packages through formal organization The following chapters are included 1 An Overview of the U S Child Care Industry 2 Here Today Gone Tomorrow 3 The Role of Staffing in Improving and Sustaining Center Quality 4 Turnover and the Quality of Child Care Services 5 Who Leaves Who Stays Who Joins 6 Work and Family Issues as Factors in Career Decisions 7 Rewards and Stresses of Child Care Work and 8 Conclusions and Recommendations

Waite, 1991 Although most children whose mothers work receive some nonparental care this child care varies tremendously in its characteristics especially quality Child development researchers and practitioners have explored in detail the characteristics of child care that provide the best environment for children However virtually nothing is known about which parents select high quality care for their children or which arrangements most often have the features associated with the best outcomes for children This Note

explores these issues using parents reports of characteristics of their child s care arrangement from the National Longitudinal Survey of Youth Results show that on several dimensions care in a home the child s own a non relative s or a relative s provides features linked to quality care However in general parents do not pay more for the features of child care associated with high quality in the child development literature The authors discuss the implications of these results

Quality Rating and Improvement Systems QRIS a strategy to improve families access to high quality child care assess the quality of child care programs offer incentives and assistance to programs to improve their ratings and give information to parents about the quality of child care These systems are operating in a growing number of states 22 states had statewide QRIS and four additional states had QRIS in one or more of their communities as of 2010 Given that QRIS are used in a growing number of states and communities it is helpful to examine the range of approaches these states and communities are taking in designing and implementing QRIS It is also important to examine the opportunities and barriers for QRIS in achieving the goals of improving the quality of child care and increasing access to high quality child care for families particularly for the most vulnerable families QRIS can be a tool for improving the quality of care accessed by low income families who cannot afford high quality care on their own To gain more insight into different strategies for shaping and implementing QRIS the Center for Law and Social Policy CLASP and the National Women s Law Center NWLC interviewed 48 child care center directors from nine states about their experiences with QRIS The directors offered valuable perspectives on what is working in their QRIS and how the systems could be improved The directors observations indicate that QRIS work best when they help child care providers improve quality on an ongoing basis by providing financial mentoring and other support and when they effectively align with other high quality early childhood and after school systems To that end NWLC and CLASP recommend that state and local policy makers

- 1 Set quality rating standards that appropriately reflect elements essential to the quality of care
- 2 Establish a quality assessment process that is reliable and responsive
- 3 Provide sufficient sustained incentives and support for improving quality
- 4 Design QRIS to meet the needs of all children
- 5 Educate parents about QRIS and high quality care and
- 6 Align QRIS with other high quality programs and components within the early childhood system
