Quantifying The World United Nations Ideas And Statistics:

The United Nations as a Knowledge System Nanette Svenson, 2015-10-16 This book seeks to explore how the UN has generated warehoused disseminated structured packaged expanded transferred and leveraged its vast resources of accumulated information and experience throughout the decades and particularly since the start of the 21st century with the introduction of more connective information and communications technology It examines the overarching objectives that have guided such activity and divides UN knowledge management into three distinct but often overlapping and intertwining categories knowledge for social and organizational learning knowledge for norm setting and knowledge for creation of products and services Svenson brings together these multiple aspects of UN knowledge management to present a holistic view of how the organization utilizes its global intelligence to educate advocate and serve member countries development Instead of looking at the UN as an international bureaucracy or as a peacekeeping policymaking humanitarian or development entity this work studies the UN as a generator and purveyor of information learning and experience in all of these areas This book will be key reading for all students and scholars of international organizations **The Oxford**

Handbook on the United Nations Thomas G. Weiss, Sam Daws, 2018-06-28 This Handbook provides in one volume an authoritative and independent treatment of the UN's seventy year history written by an international cast of more than 50 distinguished scholars analysts and practitioners It provides a clear and penetrating examination of the UN's development since 1945 and the challenges and opportunities now facing the organization It assesses the implications for the UN of rapid changes in the world from technological innovation to shifting foreign policy priorities and the UN's future place in a changing multilateral landscape Citations and additional readings contain a wealth of primary and secondary references to the history politics and law of the world organization This key reference also contains appendices of the UN Charter the Statute of the International Court of Justice and the Universal Declaration of Human Rights *Life by Algorithms* Catherine

Besteman, Hugh Gusterson, 2019-05-23 Essays on the downsides dysfunctions and dangers of automated decision making An excellent survey of the algorithmically managed life Choice The phone systems that businesses use to screen calls The link between student standardized test scores and public schools access to resources The algorithms that regulate patient diagnoses and reimbursements to doctors The impenetrable corporate bureaucracy that can drive customers in need of help up the wall or drive them to suicide The storage sorting and analysis of massive amounts of information have enabled the automation of decision making at an unprecedented level Meanwhile computers have offered a model of cognition that increasingly shapes our approach to the world The proliferation of roboprocesses is the result as editors Catherine Besteman and Hugh Gusterson observe in this rich and wide ranging volume which features contributions from a distinguished cast of scholars in anthropology communications international studies and political science Though automatic processes are designed to be engines of rational systems the stories in *Life by Algorithms* reveal how they can in fact produce absurd

inflexible or even dangerous outcomes. Joining the call for algorithmic transparency, the contributors bring exceptional sensitivity to everyday sociality into their critique to better understand how the perils of modern technology affect finance, medicine, education, housing, the workplace, food production, public space, and emotions, not as separate problems but as linked manifestations of a deeper defect in the fundamental ordering of our society.

The Machine Stops E. M. Forster's 1909 science fiction story tells the tale of a human society collapsing when the technology upon which it has become dependent fails. Think of this volume as *The Machine Starts*, a collection of unsettling ethnographic accounts of the rise of algorithmic governance. A necessary and sobering call to arms.

UN Ideas That Changed the World Richard Jolly, Louis Emmerij, Thomas G. Weiss, 2009-09-01

Ideas and concepts have been a driving force in human progress and they may be the most important legacy of the United Nations. UN ideas have set past, present, and future international agendas in many global economic and social arenas and have also led to initiatives and actions that have improved the quality of human life. This capstone volume draws upon findings of the other 14 books in the acclaimed United Nations Intellectual History Project Series. The authors not only assess the development and implementation of UN ideas regarding sustainable economic development and human security but also apply lessons learned to suggest ways in which the United Nations can play a fuller role in confronting the challenges of human survival with dignity in the 21st century.

The A to Z of the United Nations Jacques Fomerand, 2009-07-29

Consisting of 192 Member States, the United Nations was founded in 1945 to maintain international peace and security, to develop friendly relations among nations based on the respect for the principle of equal rights and self-determination of peoples, to achieve international cooperation in solving problems of an economic, social, cultural, or humanitarian character, and encouraging respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language, or religion. Just how successful the UN has been in maintaining these goals is covered in *The A to Z of the United Nations*. Author Jacques Fomerand provides a comprehensive dictionary of nearly 900 cross-referenced entries on the UN's various committees and organizations, its leaders, terms, policies, and major events in which the UN took part. Supplementing the dictionary entries are a chronology, an introduction, a bibliography, and appendixes which include a reproduction of the UN's Charter and the Universal Declaration of Human Rights, as well as a list of the Member States and when they joined.
