Quantitative Criminology Innovations And Applications:

Quantitative Criminology John Hagan, 1982-10-01 These stimulating essays examine creative methodologies test important hypotheses and cast new light on major concerns in criminology and criminal justice They exemplify the growing importance of quantitative criminology as a critical context in which novel ideas are matched with new kinds of data and new modes of analysis The Sage Research Progress in Criminology series continues to present the important and challenging issues Writers from a variety of disciplines and numerous countries contribute to the papers which have a wide spread of interest and relevance to the current debate in the crime field The seven chapters in Quantitative Criminology are excellent examples of the creative use of quantitative technique

Handbook of Quantitative Criminology Alex R. Piquero, David Weisburd, 2009-12-16 Quantitative criminology has certainly come a long way since I was first introduced to a largely qualitative criminology some 40 years ago when I was recruited to lead a task force on science and technology for the President's Commission on Law Enforcement and Administration of Justice At that time criminology was a very limited activity depending almost exclusively on the Uniform Crime Reports UCR initiated by the FBI in 1929 for measurement of crime based on victim reports to the police and on police arrests A typical mode of analysis was simple bivariate correlation Marvin Wolfgang and colleagues were making an important advance by tracking longitudinal data on arrests in Philadelphia an innovation that was widely appreciated And the field was very small I remember attending my first meeting of the American Society of Criminology in about 1968 in an anteroom at New York University there were about 25-30 people in attendance mostly sociologists with a few lawyers thrown in That Society today has over 3,000 members mostly now drawn from criminology which has established its own clear identity but augmented by a wide variety of disciplines that include statisticians economists demographers and even a few engineers This Handbook provides a remarkable testimony to the growth of that field Following the maxim that if you can't measure it you can't understand it we have seen the early dissatisfaction with the UCR replaced by a wide variety of new approaches to measuring crime victimization and offending

Estimation of Victimization Prevalence Using Data from the National Crime Survey D. G. Saphire, 2012-12-06 The National Crime Survey is a sample survey of housing units conducted by the U.S. Bureau of the Census All eligible occupants of a sampled unit are interviewed every six months for up to seven interviews about victimizations that they have experienced during the previous six months In this monograph several longitudinal analyses are performed using a subsample of the data covering the years 1973 through 1975 In particular several methods of estimating the proportion of units that are crime free for a given year denoted by θ are discussed First several ad hoc as opposed to model based estimators of θ are discussed including those used by the Bureau of Justice Statistics We find models under which these estimators are consistent for θ One such model fits the data very well A superpopulation approach to the estimation of θ is then taken assuming that the nonresponse and sampling mechanisms are ignorable Three models are fit to the data: a homogeneous Bernoulli model under which

victimization is independent from month to month ii a correlated Bernoulli model under which victimization in any two months has positive correlation p and iii a two state Markov model with states victimized and crime free The correlated Bernoulli model is found to be very inadequate The other two models fit the 1975 data well but have rather poor fits to the 1973 and 1974 data Rotation group biases are conjectured to be the cause of these poor fits **Radical and Marxist**

Theories of Crime Paul B. Stretesky, 2017-03-02 The essays selected for this volume show how radical and Marxist criminology has established itself as an influential critique since it emerged in the late 1960s Unlike orthodox criminology which emphasizes individual level explanations of criminal behavior radical and Marxist criminology emphasizes power inequality and structures especially those related to class as key factors in crime law and justice This collection of essays draws attention to the way in which structural forces shape and influence both individual and institutional for example governmental behavior highlights neglected crime corporate governmental state corporate and environmental which causes more extensive damage than the street crimes examined by orthodox criminology and discusses the ways in which law and criminal justice processes reinforce power structures and contribute to class control *The Indian Journal of Criminology & Criminalistics*, 1983 The Persistent Prison? Maeve Winifred McMahon, 1992-01-01 The Prison system is widely believed to be an immutable element of contemporary society Many criminologists and sociologists of deviance believe that decarceration movements have failed to yield progressive reform and that feasible alternatives to the prison system do not exist Maeve McMahon challenges these views Reconstructing the emergence of critical perspectives on decarceration she examines analytical and empirical problems in the research She also points out how indicators of community programs and other penalties serving as alternatives to prison have typically been overshadowed through critical focus on their effects in widening the net of control McMahon presents a detailed analysis of decreasing imprisonment and of the part played by alternatives in this during the postwar period in Ontario Drawing from extensive documentary research and from interviews with former correctional officials she charts the changing climates of opinions and socio economic factors which facilitated decarceration By situating her analysis in the context of theoretical and political arguments about the possibility of decarceration McMahon provides in her work a stimulus to the development of progressive penal politics not just in Canada but in all western countries **The Contexts of Juvenile Justice Decision Making** Michael J. Leiber, 2003-08-14 Explores the contexts of judges decision making in juvenile courts that incarcerate disproportionately more minorities than whites An in depth examination of the contextual nature of decision making and the causes of disproportionate minority confinement in four relatively homogenous juvenile courts in Iowa this book explores the subjective social psychological processes of juvenile court officers and the factors that influence those processes Iowa although a state with a predominantly white population has one of the highest minority incarceration rates for juveniles Michael J Leiber focuses on the relationships between adherence to correctional orientations such as retribution and rehabilitation and decision makers views concerning race crime family

and respect for authority with judgments and differential outcomes for youth Quantitative and qualitative methodologies are used to determine the extent to which correctional ideologies and decision makers stereotyping of minorities are fueled by a wide range of contingencies the impact of case processing and outcomes of whites African Americans and Native Americans and how it varies by jurisdiction a must not only for researchers but also for policy makers and practitioners Criminal Justice Review This is a highly readable book that covers a topic of major importance in present day society As Leiber notes the role of decision makers attitudes is an important yet largely ignored variable and the qualitative portion of his study are an important contribution to the literature Randall G Shelden University of Nevada at Las Vegas *The Social Contexts of Criminal Sentencing* Martha A. Myers, Susette M. Talarico, 2012-12-06 Historically the announcement and invocation of criminal penalties were public spectacles Today fear of crime and disaffection with the criminal justice system guarantee that this public fascination with punishment continues In the past decade virtually every legislature in the country has undertaken sentencing reform in the hope that public concern with crime would be allayed and disparities in criminal sentences would be reduced if not eliminated Scholars have intensified their longstanding preoccupation with discrimination and the sources of disparate treatment during sentencing issues that continue to fuel contemporary reform efforts As documented in Chapter 1 empirical research on sentencing has concentrated much of its attention on the offender Only recently have attempts been made to imbed sentencing in its broader organizational and social contexts Our study extends these attempts by quantitatively analyzing the relationship between the offender and the social contexts in which he or she is sentenced We use data on felony sentencing in Georgia between 1976 and 1985 to ask three questions The first addresses an issue of perennial concern during sentencing how important are offender attributes both those of explicit legal relevance and traits whose legal relevance is questionable or nonexistent The second question directs attention to the social contexts of sentencing and asks whether they directly affect sentencing outcomes *The SAGE Handbook of Innovation in Social Research Methods* Malcolm Williams, W Paul Vogt, 2011-03-11 Social research is a burgeoning field Of course it has many traditions and approaches but there is a high premium upon thinking differently and thinking anew because social life is never static or wholly predictable The Handbook edited by internationally recognized scholars provides a comprehensive pitch perfect critical assessment of the field The main features of the Handbook are Clear organization into 4 parts dealing with The Social Context of Research Design and Data Collection Integrating The Analysis of New Data Types Sampling Inference and Measurement Clear cutting edge chapters on Objectivity Causation Organizing Social Research Correspondence Analysis Grounded Theory Conversational Surveys Mixed Methods Meta Analysis Optimal Matching Analysis GIS Analysis Quantitative Narrative Analysis Longitudinal Studies SEM MLM Qualitative Comparative Analysis Respondent Driven Sampling Brings together a glittering assembly of the key figures working in the field of research methods Demonstrates the continuities and productive tensions between classical traditions and real world research The result is a superbly organized

text which will be required reading for anyone interested in the routes and future of social research It is an unparalleled teaching resource and a must have for serious social researchers *Highlights from 20 Years of Surveying Crime Victims*,1993 *Delays in Youth Justice* Jeffrey A.
