**History and Economic Life** Georg Christ, Philipp R. Rössner, 2020-02-27. History and Economic Life offers students a wide ranging introduction to both quantitative and qualitative approaches to interpreting economic history sources from the Middle Ages to the Twentieth Century. Having identified an ever widening gap between the use of qualitative sources by cultural historians and quantitative sources by economic historians, the book aims to bridge the divide by making economic history sources more accessible to students and the wider public and highlighting the need for a complementary rather than exclusive approach. Divided into two parts, the book begins by equipping students with a toolbox to approach economic history sources, considering the range of sources that might be of use and introducing different ways of approaching them. The second part consists of case studies that examine how economic historians use such sources, helping readers to gain a sense of context and understanding of how these sources can be used. The book thereby sheds light on important debates both within and beyond the field and highlights the benefits gained when combining qualitative and quantitative approaches to source analysis. Introducing sources often avoided in culturally minded history or statistically minded economic history courses respectively and advocating a combined quantitative and qualitative approach, it is an essential resource for students undertaking source analysis within the field.

This bibliography provides the reader with a comprehensive reference tool that will enhance understanding of methodological issues and enable the user to employ research methods appropriate to their subject of study. It also provides accounting historians a comprehensive data base for the development of papers addressing methodological issues in an accounting history context. Access to this type of resource is particularly crucial to the development of accounting history research, since the number of papers dealing with methodological issues published in accounting history literature is very small. Hence the references in this bibliography are drawn from the literature of general history, economic and business history, legal and social history and philosophy. The scope and range of its contents are broad; references are taken from texts as well as papers published in over
