Quantitative Methods In On Line Systems:

Quantitative Methods in On-line Systems John A. T. Pritchard, 1976 The objectives of this book are to describe queuing theory and other quantitative methods to show how these methods may be applied in the design of an on line system In particular it discusses how response times are estimated how an efficient data transmission block size is determined and how system availability is investigated The book is written for systems designers and consultants who will be concerned with the sizing of an online system Computer professionals who have to carry out response time calculations and design systems which meet specified performance criteria are faced with such questions as what types of component is required How many components are required How should the components be interconnected This book explains methods which can be of assistance in answering questions like these The reader may be someone who has or may be expected at some future date to design a system or someone who will have to evaluate alternative proposals prepared for his organizations by equipment suppliers or by a consultancy company It is assumed that the reader is familiar with batch data processing *Wiley CMA Learning System Exam Review 2013, Test Bank* IMA, 2013-02-12 Wiley CMA Learning System consists of Part 1 Financial Planning Performance and Control which covers the topics of Planning Budgeting and Forecasting Performance Management Cost Management Internal Controls and Professional Ethics As well as Part 2 Financial Decision Making covers the topics of Financial Statement Analysis Corporate Finance Decision Analysis and Risk Management Investment Decisions and Professional Ethics It contains key formulas knowledge checks at the end of each topic study tips and practice questions providing candidates with what they need to pass the CMA Exam Also included is access to the CMA test bank which contains over 2 000 questions **Online Distance Education** Olaf Zawacki-Richter, Terry Anderson, 2014-06-01 Online Distance Education Towards a Research Agenda offers a systematic overview of the major issues trends and areas of priority in online distance education research In each chapter an international expert or team of experts provides an overview of one timely issue in online distance education summarizing major research on the topic discussing theoretical insights that guide the research posing questions and directions for future research and discussing the implications for distance education practice as a whole Intended as a primary reference and guide for distance educators researchers and policymakers Online Distance Education addresses aspects of distance education practice that have often been marginalized including issues of cost and economics concerns surrounding social justice cultural bias the need for faculty professional development and the management and growth of learner communities At once soundly empirical and thoughtfully reflective yet also forward looking and open to new approaches to online and distance teaching this text is a solid resource for researchers in a rapidly expanding discipline **Addiction Research and Evaluation** Catherine Comiskey, 2024-09-12 According to the United Nations Office of Drugs and Crime around 284 million people aged between 15 and 64 years used drugs in the year 2020 In addition it is estimated that over 11 million people were injecting drugs and half of these were living with hepatitis C Young

people are using more drugs than previously and numbers have increased over the past decade While numbers are estimated at a global level there remains little evidence for practitioners and policy makers on key questions such as how many people are using drugs that are hidden and haven't contacted services Questions include the challenging topics of providing safe injecting spaces and drug consumption rooms As populations age in some regions questions arise on the nature of substance use among older people Countries with younger populations are concerned about estimates on the numbers of children potentially impacted by parental substance use and how to engage with them Awareness of trauma informed services is increasing and questions arise on the impact of domestic abuse or adverse childhood experiences on people who use drugs and their families Globally there is a growing concern on how to inform the debate on cannabis policies and how to assess if the chosen policy will be acceptable to the general population The aim of this book is to provide researchers service providers and policy makers with a step by step guide to robust methodologies and illustrative case studies to address these challenges The objective of each chapter is to answer a key question provide a summary of the background evidence demonstrate through a series of logical steps how to obtain national or local evidence and finally illustrate the process with detailed real life case studies As addiction is encountered across a wide range of professions and civil society organizations this book will be an essential textbook for graduate students of medicine nursing public health addiction psychology and health and social care professions It will be a guiding reference book for international national and local commissioners and providers of related policies and services At a local level the step by step case studies will provide an easy to follow framework for those wishing to apply the methods to benefit and improve their own practice service or policy
