Ardalan,2016-05-13 Social theory can usefully be conceived in terms of four key paradigms functionalist interpretive radical humanist and radical structuralist The four paradigms are founded upon different assumptions about the nature of society and each generates distinctive theories concepts and analytical tools Finance theory is based on the functionalist paradigm and for the most part finance theorists are unaware of the philosophical tradition to which they belong By relating finance to the four paradigms Ardalan s work offers a concise understanding of the multifaceted nature of finance He recommends theorists adopt a diversity of paradigms and discusses its benefits by application to the following phenomena the development of academic finance the mathematical language of academic finance the mathematics of academic finance money corporate governance markets technology and education      Select Topics of Econophysics Amit Sinha,2024-11-04

Economics requires understanding and analyzing forces that bring buyers and sellers to a market place who then negotiate

exchanges of goods and services based on a mutually agreeable price Economists have their own method of modeling whereby models are first conceived of some notion of economic and financial thinking before being empirically tested and anomalies are then recognized if the observed data is inconsistent with the hypothetical underpinning This is in inherent contradiction with the modeling approaches of physicists who develop their theories principle and laws after observing empirical data The awareness that physics can enlighten the understanding of human behavior and thus economics and the interest of physicists in applying their training and models to understanding the complexities of finance and economics led to the creation of a new field of study appropriately termed as Econophysics Selected Topics on Econophysics is a collection of essays on topics that enhance and enrich our understanding of economic modeling when the same rigor of modelling used by physicists is brought to developing financial and economic theories These articles include discussions on modeling bitcoins stock index modeling using geometric Brownian motion agent based modeling wealth distribution modeling as well as modeling related to fractal regression and chaotic processes This interdisciplinary book will interest researchers graduate students and professionals in the fields of economics finance as well as physics Simulation, Optimization, and Machine Learning for Finance, second edition Dessislava A.
