undergraduate and beginning master's level students the text fills a gap in the literature for textbooks on urban planning. Additionally, the book can be used as a reference for planning practitioners and researchers when analyzing quantitative and qualitative data in urban and regional planning and related fields. The volume does not assume advanced knowledge of mathematical formulas. Rather, it begins with the essentials of research methods such as the identification of the research problems in planning, the literature review, data collection and presentation, descriptive data analysis, and report of findings. Its discipline-specific topics include field research methods, qualitative data analysis, economic and demographic analysis, evaluation research, and methods in sub-disciplines such as land use planning, transportation planning, environmental planning, and housing analysis. Designed with instruction in mind, this book features downloadable materials including learning outcomes, chapter highlights, chapter review questions, datasets, and certain Excel models. Students will be able to download review questions to enhance the learning process and datasets to practice methods.

Fundamentals of Plan Making Edward J. Jepson, Jr., Jerry Weitz, 2020-12-14 Urban and regional planning programs aspire to prepare practitioners to write and implement comprehensive plans. Yet academic planning programs often place greater emphasis on theory than practice. To help address this gap, *Fundamentals of Plan Making* gives planning students an understanding of research and methods of analysis that apply to comprehensive planning. Its informative text and examples will help students develop familiarity with various data sources and acquire the knowledge and ability to conduct basic planning analyses such as population projections, housing needs assessments, development impact analyses, and land use plans. Students will also learn how to implement the various citizen participation methods used by planners and develop an appreciation of the values and roles of practicing planners. In this revised second edition, Edward Jepson and Jerry Weitz bring their extensive experience as practicing planners and teaching faculty to give planning students the practical hands-on tools they need to create and implement real plans and policies. With an entirely new census data set, expanded discussions of sustainability and other topics, as well as new online resources including a companion website, the book is now more accessible and more informative, and its updated chapters on transportation, housing, environment, economic development, and other core planning elements also make it a handy reference for planning practitioners.

Ideology, Political Transitions and the City Aleksandra Djurasovic, 2016-06-10 Recent history has seen Bosnian and Herzegovinian BiH cities undergoing several transitions. Their cities have developed under socialism. 1945-1992 have suffered through the civil war. During the 1990s and during the last twenty years, they have been undergoing a slow and multifaceted transition to an indeterminate end point. Focusing on the post-socialist postwar and neoliberal transitions experienced in BiH, the book shows that planning systems deviated from control-oriented and top-down regulation to flexible approaches for more open, informal development. The book analyzes several levels of planning-related processes: the former Yugoslavia, BiH, the city of Mostar, and three urban zones: the Industrial Zone, Bi e Polje, the City Zone, Rondo, and the Historic District, and the Old Town Zone, in order to offer insights into the new

planning systems in the late phase of post socialist transition

Urban Planning Education Andrea I. Frank, Christopher Silver, 2017-06-26 This book examines planning education provision and approaches globally through a comparative and longitudinal perspective It explores the emergence of planning education in the 20th century with its rich variation and yet a remarkable degree of cross fertilization Each of the sections of the book is framed by an overview essay which has been prepared by the editors to provide the reader with a critical exposure to relevant scholarship drawing on the detailed case studies and exploratory essays on key issues in planning education The first part of this volume focuses on the emergence of planning education programs in the twentieth century as a way to understand the current planning education environment Then we explore how education in urban regional and spatial planning has developed in different ways in different countries and continents The final part of this volume aims to envision how planning can adapt and develop to remain relevant to the development of human environments in the 21st century Urban planning education has become a pervasive practice throughout the world as urbanization and development pressures have increased over the past half century and as demand increased for professional trained experts to guide those processes The approaches vary widely based in part upon the discipline from which the planning program developed as well as the context specific challenges within the country or region where the program resides

The Urban Ecologies of Divided Cities Amira Osman, John Nagle, Sabyasachi Tripathi, 2023-06-12 The book discusses how division affect the fabric of cities and people s sense of identity and agency and are reflected in physical features architecture and urban planning The question of divided cities represents a complex and multistranded urban Ecology at once both social and spatial it cannot be limited to a single science or discipline such as social or spatial fields This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions Urban ecologies of division manifest in multiple forms One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric Violence in such contexts is often a surface expression of deeper socio economic or ideological differences Whether as a result of intervention by authority or by dissent between groups a divided city inevitably becomes a place of conflict in various forms and intensity eroding the joy of living and sense of collective belonging to the detriment of all In effect it erodes the collective

advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers

Economic Incentives in Sub-Saharan African Urban Planning Kwasi Gyau Baffour Awuah, 2021-04-19 This book explores incentives capable of enhancing the effectiveness of urban planning systems in Sub Saharan Africa using economic theory as a framework It argues that urban planning is fundamental to the achievement of sustainable and resilient cities but against the backdrop of rising levels of urbanisation and growth poverty informal development and climate change such systems are failing to be promoted and successfully maintained in the region Across ten chapters it analyses the connection between urban planning and socio economic development indicators of effective urban planning systems and the role and influence of incentives with real world evidence It develops quantitative models to estimate the costs and benefits of urban planning systems focussing on the developing world where organised data is less accessible Using Ghana as a case study it demonstrates a step by step approach on how to implement the quantitative models discussed Economic Incentives in Sub Saharan African Urban Planning will be useful reading for researchers policy makers development agencies and students in urban planning sustainable development and economics
