Ladurie, Joseph Goy, 1982-02-25 The tithe is a levy characteristic of the agrarian ancien regime and is of great interest to historians of traditional societies such as pre 1789 France and other countries of Europe and Latin America until the beginning of the nineteenth century Measured and recorded from year to year the tithe forms an indicator which albeit very approximate is nevertheless extremely valuable in revealing the trends in agricultural production grain wine stockbreeding etc over periods of years decades or centuries The book is in two parts The first by Joseph Goy deals with theoretical questions and the methods used for research on the tithe and other associated dues The second part by Emmanuel Le Roy Ladurie in collaboration with Marie Jeanne Tits Dieuaide presents an overview of the conclusions reached from the study of secular fluctuations in the product of the tithe and in other revenues from the land These results relating to the long period from the fourteenth to the nineteenth centuries were obtained from the work of nearly a hundred historians in many countries their help was an essential element in the writing of the book *The Agrarian History of England and Wales* Edward John T. Collins, Joan Thirsk, 2000 The unifying theme of this volume is the changing role of the countryside in national life and the impact upon it of the social and economic forces unleashed by industrialisation and the growth of towns

Prairie Populism Jeffrey Ostler, 1993 Ostler shows that economic conditions alone cannot explain why populism flourished or foundered Through a study of populism in Kansas Nebraska and Iowa Ostler demonstrates that the strength or weakness of the two dominant political parties within a state had a significant effect on the success of a third party challenge An Agrarian History of Portugal, 1000-2000, 2016-11-28 This book follows the renovation of European economic history towards a more unified interpretation of sources of growth and stagnation To better understand the diversity of patterns of growth we need to look beyond the study of the industrialization of the core economies and explore the centuries before it occurred Portuguese agriculture was hardly ever at the European productivity and technological forefront and the distance from it varied substantially across the second Millennium Yet if we look at the periods of the Christian Reconquista the recovery from the Black Death the response to the globalization of the Renaissance to the eighteenth century economic enlightenment or to nineteenth century industrialization we may conclude that agriculture in this country of the European periphery was often adaptive and dynamic The fact that economic backwardness was not overcome by the end of the period is no longer the most relevant aspect of that story Contributors are Luciano Amaral Amélia Branco Dulce Freire António Henriques Pedro Lains Susana Mónica Miranda Margarida Sobral Neto Jaime Reis Ana Maria Rodrigues Jos Vicente Serrão and Ester G Silva

Petitions in Social History Lex Heerma van Voss, 2001 This book looks at petitions over the last five centuries to reconstruct the lives and opinions of humble petitioners Since Pharaonic times governments have allowed their subjects to voice opinions in the form of petitions which have demanded a favour or the redressment of an injustice To be effective a petition had to mention the request usually a motivation and always the name or names of the petitioners As a result grievances of ordinary people which were not written down anywhere else are now stored safely in the archives of the

authorities to which the petitions were addressed The petitions considered in this book which come from all over the globe offer rich and valuable sources for social historians *New Directions in European Historiography* Georg G. Iggers,1984-07 Impressive analytical essays on the transformation of historical studies in Europe In four impressively researched essays Georg Iggers recounts the transformation of historical studies in Europe during the twentieth century with particular emphasis on the historiography of the past fifteen years Although the book does survey a broad area of contemporary historical thought it is primarily a careful analytical examination of the methodological and theoretical reorientation of certain influential European historians The first essay discusses the emergence at German Universities during the eighteenth and nineteenth centuries of the concept of history as a scientific discipline distinct from the classical tradition of literary history and the later broad acceptance of this mode of Enquiry in the Western world Against this background Mr Iggers then considers the challenge to this mode of the political social and intellectual upheavals of the twentieth century especially after World War II The three essays following examine important attempts to develop alternate paradigms for historical study the French historians of the Annales tradition the German political historians of the 1960s the various Marxist historians of France Poland East Germany and Great Britain In despite of the frequent insistence by philosophers and theorists of history that history is not a science in contemporary terms historians themselves have striven in recent years to strengthen the quantitative aspects of historical study moving away from traditional patterns of writing and adopting methods and concepts from the systematic social sciences Mr Iggers book is an excellent introduction to these contemporary changes in historiography and in its comparative analyses itself makes a contribution to historical studies **The American Bibliography of Slavic and East European Studies** Patt Leonard,Rebecca Routh,2020-02-27 This bibliography first published in 1957 provides citations to North American academic literature on Europe Central Europe the Balkans the Baltic States and the former Soviet Union Organised by discipline it covers the arts humanities social sciences life sciences and technology The New History Theodore K. Rabb,Robert I. Rotberg,2017-03-14 In this volume a diverse group of leading historians analyzes the future needs of their craft and suggests the many ways in which scholars of the near future will interpret the events of earlier years Originally published in 1983 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **A Patriot's History of the United States** Larry Schweikart,Michael Patrick Allen,2004-12-29 For the past three decades many history professors have allowed their biases to distort the way America s past is taught These intellectuals have searched for instances of racism sexism and bigotry in our history while downplaying the greatness of America s patriots and the

achievements of dead white men As a result more emphasis is placed on Harriet Tubman than on George Washington more about the internment of Japanese Americans during World War II than about D Day or Iwo Jima more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin A Patriot s History of the United States corrects those doctrinaire biases In this groundbreaking book America s discovery founding and development are reexamined with an appreciation for the elements of public virtue personal liberty and private property that make this nation uniquely successful This book offers a long overdue acknowledgment of America s true and proud history
