Quantitative Tools for Decision Support Using IFPS Donald R. Plane, 1986

Decision Support Systems: Experiences and Expectations T. Jelassi, M.R. Klein, W.M. Mayon-White, 2014-06-28 This proceedings volume aims to consolidate current knowledge of research into the many fields of DSS and to identify key issues which should be incorporated into the future research agenda The main themes of this volume include DSS for distributed decision processes Embedding knowledge in DSS and DSS and organizational change

Decision Support David Schuff, David Paradice, Frada Burstein, Daniel J. Power, Ramesh Sharda, 2010-11-25 This volume of Annals of Information Systems will acknowledge the twentieth anniversary of the founding of the International Society for Decision Support Systems ISDSS by documenting some of the current best practices in teaching and research and envisioning the next twenty years in the decision support systems field The volume is intended to complement existing DSS literature by offering an outlet for thoughts and research particularly suited to the theme of describing the next twenty years in the area of decision support Several subthemes are planned for the volume One subtheme draws on the assessments of internationally known DSS researchers to evaluate where the field has been and what has been accomplished A second subtheme of the volume will be describing the current best practices of DSS research and teaching efforts A third subtheme will be an assessment by top DSS scholars on where the DSS discipline needs to focus in the future The tone of this volume is one of enthusiasm for the potential contributions to come in the area of DSS contributions that must incorporate an understanding of what has been accomplished in the past build on the best practices of today and be integrated into future decision making practices The primary questions raised by this volume are What will information systems based decision support entail in twenty years What research is needed to realize the envisioned future of information systems based decision support How will the teaching of information systems based decision support change over the next twenty years What are the best practices of teaching in the decision support area that can be leveraged to best disseminate DSS knowledge advances to students and practitioners

Computational Intelligence, II G. Mauri, M. Filippini, F. Gardin, 1990-06-01 The focus of this volume is Heterogeneous Knowledge and Problem Solving Integration i e the combined use of different knowledge representation and problem solving paradigms This is a central topic for the design and implementation of problem solving systems since from a pragmatic and engineering standpoint the solution of a large class of problems cannot take place within one single representation language or problem solving paradigm Heterogeneous systems represent not only a pragmatic answer but also a theoretical alternative to the homogeneous paradigms

Decision Support and Expert Systems Efraim Turban, 1993

Handbook on Decision Support Systems 1 Frada Burstein, Clyde W. Holsapple, 2008-01-22 Decision support systems have experienced a marked increase in attention and importance over the past 25 years The aim of this book is to survey the decision support system DSS field covering both developed territory and

emergent frontiers It will give the reader a clear understanding of fundamental DSS concepts methods technologies trends and issues It will serve as a basic reference work for DSS research practice and instruction To achieve these goals the book has been designed according to a ten part structure divided in two volumes with chapters authored by well known well versed scholars and practitioners from the DSS community

Decision Support Systems Daniel Power,2004-12 For MIS specialists and nonspecialists alike a comprehensive readable understandable guide to the concepts and applications of decision support systems

Economics and Cognitive Science Paul Bourguine,Bernard Walliser,2014-06-28 Economics dealing with mental processes of decision makers is part of cognitive science conversely cognitive science faced with constraints on information processing is part of economics In July 1990 the Cecoia 2 conference was organised in Paris to further explore the connections between the two The papers presented in this volume illustrate this truly interdisciplinary research intertwining social and cognitive sciences Three main topics are represented agent s mental representation when facing complex uncertainty agent s computational constraints leading to bounded rationality agent s learning and evolution in an imperfectly known environment

Optimizing Regional Development Through Transformative Urbanization Benna, Umar G.,2018-08-10 Assisted by globalization and the rapid application of advanced technologies the transformative power of urbanization is being felt around the world The scale and the speed of existing and projected urbanization poses several challenges to researchers in multiple disciplines such as computer science engineering and the social sciences Optimizing Regional Development Through Transformative Urbanization provides emerging research exploring the theoretical and practical aspects of applications within urban growth interventions It also explores the strategies for new urban development tools such as the rise of new platforms for digital activities concepts of sharing economy collaborative economy crowdsourcing and crowdfunding Featuring coverage on a broad range of topics such as cryptocurrencies public private partnership and urban governance this book is a vital reference for city development planners decision makers policymakers academicians researchers and professionals seeking current research on the delivery of transformative urbanization changes

Office Automation Don Tapscott,2013-11-21 Every pioneer takes large risks hoping that the new frontier he seeks will provide the benefits of independence and good fortune Don Tapscott is such a pioneer in the area of office automation He has

been a true pioneer having entered the field in its early days and taken the risk of working not in technology which was fashionable but in the field of the problems of organizations which was less fashionable but in many ways more important. The utilization of computers for data processing, accounting, inventory, and other bread and butter applications is now well entrenched in our society and culture. The process of designing such systems tends to focus on the needs of the company and the constraints of the equipment, leading to efficient systems with little tolerance for the variety of people who must use or interface with them. Within the office automation area, these methods do not work nearly as well. The frequency and amount of human interaction in the office environment and the wide variety of situations and reactions there in demands a different design methodology.

Decoding **Quantitative Tools For Decision Support Using Ifps**: Revealing the Captivating Potential of Verbal Expression

In a period characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its capability to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**Quantitative Tools For Decision Support Using Ifps**," a mesmerizing literary creation penned by way of a celebrated wordsmith, readers embark on an enlightening odyssey, unraveling the intricate significance of language and its enduring effect on our lives. In this appraisal, we shall explore the book's central themes, evaluate its distinctive writing style, and gauge its pervasive influence on the hearts and minds of its readership.
