Heisenberg, a.o. Volume IV, Part III: 1955-1956 Wolfgang Pauli, 2008-05-10 Aus Paulis letztem Lebensjahrzehnt sind über 2000 Briefe erhalten und in diesem grundlegenden Werk zur Physikgeschichte der Nachkriegszeit zusammengefaßt. Neben der Physik wird hier auch der allgemeinere geistesgeschichtliche Hintergrund unserer Naturwissenschaft beleuchtet. Dieser Teilband enthält wissenschaftliche Korrespondenz über grundlegende und andere allgemeine Fragen der Physik der Jahre 1955-1956. In diese Zeit fallen der Beginn der axiomatischen Feldtheorie, die Anfänge von CERN, der Berner Relativitätskongress zur 50. Jahrfeier von Einsteins Entdeckung sowie Niels Bohrs 70. Geburtstag und natürlich die frühe Geschichte des Neutrinos. Pauli und seine Briefpartner nehmen aktiv an diesen Ereignissen teil und beleuchten sie in eindrucksvoller Weise in ihrer Korrespondenz. Die reich annotierten und kommentierten Briefe sind chronologisch angeordnet und durch Verzeichnisse und Register erschlossen. From the final decade of Pauli's life nearly 2000 letters survive. These are collected in this fundamental work on the history of physics in the post-war era. Going beyond physics, these letters also shed light on the cultural and philosophical background of our natural sciences. This part of the collection contains scientific correspondence about fundamental and other general questions concerning physics in the years 1955-1956. This period saw the beginnings of axiomatic field theories, the birth of CERN, the Berner Relativity Congress marking the 50th Anniversary of Einstein's discovery and Niels Bohr's 70th birthday. They were also the formative years of neutrino physics. Pauli and his correspondence partners played an active role in these events and illuminate them in an impressive manner in their letters. The extensively annotated and commented letters are organized chronologically and complemented by indexes and references.

Wissenschaftlicher Briefwechsel mit Bohr, Einstein, Heisenberg u.a. / Scientific Correspondence with Bohr, Einstein, Heisenberg a.o. Wolfgang Pauli, 2007-08-08 Mit dem Druck von Wolfgang Paulis Briefwechsel aus seinen letzten beiden Lebensjahren wird eine groß angelegte Edition der gesamten wissenschaftlichen Korrespondenz eines der bedeutendsten theoretischen Physiker des 20. Jahrhunderts abgeschlossen, der an der Entwicklung der wichtigsten physikalischen Ideen und Theorien insbesondere an der Relativitätstheorie und Quantentheorie sowie deren weiteren Ausbau zu einer Feld- und Elementarteilchentheorie teilgenommen hat. Der vorliegende besonders umfangreiche Band mit 711 Briefen behandelt die durch Wu Telegdi Lederman u. a. bei den schwachen Wechselwirkungen beobachtete Paritätsverletzung, bei der das einst von Pauli postulierte Neutrino eine herausragende Rolle spielt und die in der Theorie der Elementarteilchen einen allgemeinen Umschwung einleitete. Neue Einblicke vermittelt der Briefwechsel in die enge Zusammenarbeit von Pauli und Heisenberg anlässlich einer damals entwickelten einheitlichen Feldtheorie der Elementarteilchen. This volume of the letters Wolfgang Pauli wrote during the final two years of his life completes the publication of the entire scientific correspondence of one of the most important theoretical physicists of the 20th century. Pauli played a vital role in the development of the most important physical ideas and theories of his time: relativity and quantum mechanics in particular and also in their extension to elementary particle field theory. This especially extensive

volume covers more than 700 letters between Pauli and scientists such as Wu Telegdi Lederman and others in which he discussed parity violation observed under the weak interaction in which the neutrino first postulated by Pauli plays a crucial role The letters also provide new insights into the close cooperation between Pauli and Heisenberg on their work on the unified field theory of elementary particles which was being developed at that time **INIS Atomindex** ,1985
