Quantum Society:

Quantum Society Danah Zohar,1995-07-24 In The Quantum Society authors Danah Zohar and Ian Marshall offer a compelling vision for transforming society using the insights of quantum physics to illuminate their ideas Diversity they suggest is the creative evolutionary force and the more diverse the society the greater the opportunity for transformation and growth Their theory of cosmic and social evolution allows us to discover the meaning and purpose of society through an appreciation and understanding of pluralistic thinking The result is an all embracing social model that celebrates the dynamic unity that is possible when we work together to orchestrate and articulate our interdependence The quantum society is flexible evolving and ambiguous In short it reflects the idea of society as a living system The authors use the language of physics to provide the images and metaphors appropriate for understanding the principles that inform this system bringing into focus our harmonious place within the natural world

honour crimes comprising violent acts such as assault and even murder Its deputy director for the Middle East and North Africa Aya Majzoub said Until the Iraqi authorities adopt robust legislation to protect women and girls we will inevitably continue to witness horrific murders Hence it is imperative that the Universal Declaration of Human Rights UDHR and the Convention on the Elimination of all Forms of Discrimination Against Women CEDAW are manifested in the Republic of Iraq

The Legacy of the Communist Party of China (CPC) □ A Study of Civil Unrest, Civilian Suffering and Violations of Human Rights in the Hong Kong Special Administrative Region of the People's Republic of China Dr. Mark O'Doherty, 2019-07-10
There is a saying in China that power comes out of the barrel of a gun a policy practiced by hardliners of the CPC during the Tiananmen Square Massacre of 1989 and even today in China as outlined in this evidenced based study also in view of increased violent clashes between police and protesters in Hong Kong with the military commander of Hong Kong Mr Chen Daoxiang stoking fears of Chinese military intervention which could lead to a repeat of the Tiananmen Square Massacre of 4 June 1989 President Xi of China could quickly and humanely solve the Hong Kong problem President Xi being a very powerful but also a very kind and gentle leader by permitting an independence referendum in Hong Kong to resolve the Two Systems Crisis since the Spirit of Democracy is here to stay and will remain in the hearts of the brave people of Hong Kong forever The brave and courageous people of Hong Kong taking the vanguard so that democracy and civil rights can finally be manifested for all in Hong Kong

The Legacy of the Social Democratic Party of Austria (SPÖ) □ A Dictatorial Party facilitating Abuse of Power, Bureaucratic Despotism and Violations of Human Rights in the Republic of Austria Dr. Mark O'Doherty, 2019-08-15
Having become a proxy party of the right wing populist FP Party by falling in line with whatever the FP dictates the SP Party is unwilling to implement any much needed reforms in the Republic of Austria Hence the reason why inequality and poverty are increasing in Austria dramatically the SP Party being a willing collaborator in perpetrating inequality injustice and human rights violations in the country Austria has also fallen back seven places on the Social Progress Index SPI inequality and social discrimination of people increasing dramatically the SP Party unwilling to advocate the implementation of a Basic Income Guarantee BIG which would be necessary to guarantee basic human rights and to stop the discrimination of unemployed people which causes grave political instability and civil unrest In a world where there are no guarantees and as citizens who must be under government rule we should at least be assured that we will be able to feed clothe and handle the simplest needs of human beings hence implementing a basic income is an important prerequisite to counteract inequality and to ensure basic human rights in the International Community It is also imperative that a denazification is implemented in the Republic of Austria This includes bringing all right wing extremists in Austria to Justice in particular from the FP Party so that Rule of Law and the Universal Declaration of Human Rights UDHR can be restored in the Republic of Austria Furthermore corrupt and criminal officials in the Austrian Nehammer Government as well as the SP Party must be brought to Justice so that Rule of Law Goodness and Decency can be restored in the Republic of Austria NB It

should also be noted that some individuals and organizations affiliated with the SP Party are responsible for Press Freedom attacks and politically motivated harassment on the NGO BTB Global Peacebuilding This must stop The NGO BTB Global Peacebuilding frequently has the task to pacify and bring peace to a country which is very delicate PEACEBUILDING and DIPLOMATIC work where just a slight disturbance can cause a political calamity of global impact Hence it is very much in the interest of Austrian politicians including the SP Party to provide us with a proper and secured Home Office and Basic Income so that the NGO BTB Global Peacebuilding can conduct its work properly and efficiently

The Legacy of the Freedom Party of Austria (FPÖ) – A Dictatorial Party facilitating Abuse of Power, Social Inequality and Neo-Nazi Activities in the Republic of Austria

Dr. Mark O'Doherty, 2019-08-28 Having emerged from the ashes of the Third Reich the FP was founded in 1956 by Anton Reinthaller a former Nazi functionary and SS officer who was the inaugural leader of the Freedom Party of Austria FP Since then the FP has orchestrated rule of law violations in Austria including the violation of freedom of press expression and of belief as well as inciting hatred against immigrants and refugees With national socialist offences by the FP increasing in frequency the FP needs to improve and reinvent itself also in view of links between the 2019 Christchurch mosque shootings and the far right Identitarian Movement in Austria IB Otherwise the FP must be made illegal as it is Austria's duty to combat the resurgence of neo-Nazi activities by way of law Social challenges such as abuse of power and social inequality are also explored in this evidence based study It should also be noted that the FP Party's contribution to global gender equality and global peacebuilding is absolute zero

Mark O'Doherty, 2020 A group of 24 senior diplomats and defence officials including four former Nato secretary generals have urged Donald Trump to save potentially hundreds of thousands of lives lost to coronavirus across the Middle East by easing medical and humanitarian sanctions on Iran The call has the backing of the former EU foreign affairs chief the former director general of the World Health Organization and senior American diplomats in the Bush Clinton and Obama administrations Iranians are facing one of their country's darkest times in living memory the group says Reaching across borders to save lives is imperative for our own security and must override political differences among governments it adds From my side I also advise President Trump to save hundreds of thousands of lives across the Middle East by easing medical and humanitarian sanctions on Iran My prayers are with all people afflicted by the virus calling on God's help to manifest health and healing in Iran and the International Community

The Legacy of Jair Bolsonaro and the Federal Government of Brazil – A Dictatorial Government facilitating Abuse of Power, Rule-of-Law Violations and Violations of Human Rights in the Federative Republic of Brazil

Dr. Mark O'Doherty, 2020-02-05 With the world's fourth largest democracy having elected an oppressive far right government into power emotions are running high in Brazil today's Brazil being at risk of becoming a dictatorship again with press freedom

violations police violence and overall human rights violations increasing dramatically in the country especially among the LGTB community Brazil having the highest number of transgender murders globally Inequality is another topic this book explores with more than fifty million Brazilians nearly 25 percent of the population living below the poverty line having family incomes of no more than 389 per month and only 5 50 a day Also deforestation in the Brazilian Amazon is a lucrative business largely driven by criminal networks that threaten and attack government officials forest defenders and indigenous people who try to stop them according to a report by Human Rights Watch Hence it is very important that rule of law justice peace and prosperity are restored in Brazil

The Legacy of the Social Democratic Party (SPÖ) and the City Council of Vienna □ A Dictatorial Party facilitating Mediocrity, Victimisation and Violation of Human Rights in the Republic of Austria Dr. Mark O'Doherty, 2018-07-22 The SP Party has governed Vienna and Austria on a national level for a few years since 1946 The SP Party is also responsible for facilitating mediocrity victimisation and violation of human rights in Austria This includes victimisation of clients at the Social Welfare Department and the Public Employment Service in Vienna AMS as well as the Department of Families the author having conducted observational studies within these departments Being shielded by the SP Party bureaucrats in the Vienna magistrates are not held accountable when victimising marginalized people and clients abusing their power at their disgression so this evidence based study concludes Social challenges such as abuse of power bureaucratic despotism and solidarity deficit within the SP are also explored in this evidence based study so that basic human rights can be restored in Austria It should also be noted that the SP Party's contribution to global gender equality and global peacebuilding is absolute zero

Quantum Language and the Migration of Scientific Concepts Jennifer Burwell, 2018-02-09 How highly abstract quantum concepts were represented in language and how these concepts were later taken up by philosophers literary critics and new age gurus The principles of quantum physics and the strange phenomena they describe are represented most precisely in highly abstract algebraic equations Why then did these mathematically driven concepts compel founders of the field particularly Erwin Schrödinger Niels Bohr and Werner Heisenberg to spend so much time reflecting on ontological epistemological and linguistic concerns What is it about quantum concepts that appeals to latter day Eastern mystics poststructuralist critics and get rich quick schemers How did their interpretations and misinterpretations of quantum phenomena reveal their own priorities In this book Jennifer Burwell examines these questions and considers what quantum phenomena in the context of the founders debates over how to describe them reveal about the relationship between everyday experience perception and language Drawing on linguistic literary and philosophical traditions Burwell illuminates representational and linguistic problems posed by quantum concepts the fact for example that quantum phenomena exist only as probabilities or tendencies toward being and cannot be said to exist in a particular time and place She traces the emergence of quantum theory as an analytic tool in literary criticism in particular the use of wave particle duality in interpretations of gender differences in the novels of Virginia Woolf and critics connection of Bohr's Principle of Complementarity to poetic form she examines the quantum mysticism of Fritjof Capra and Gary Zukav and she concludes by analyzing nuclear discourse in the context of quantum concepts arguing that it too adopts a language of the unthinkable and the indescribable

A Tear for China's Children □ A Study of Democratic Deficit, Human Rights Violations and Militarism in the People's Republic of China Dr. Mark O'Doherty, 2017-05-27 In June 2019 human rights lawyer Ji Sizun received the news that he had won a prestigious human rights distinction the Cao Shunli Memorial Award in honour of the

veteran Chinese activist who died in 2014 in police custody after being denied needed medical treatment for months It would be a little more than one month until he himself died while under the watch of state security Ji one of China's most prominent barefoot lawyers self taught legal advocates spent most of the last decade in prison in his native Fujian province He was in a semi comatose state when he finished his most recent sentence of four and a half years in April 2019 and was immediately sent to a hospital On 10 July 2019 two months after leaving prison Ji 69 died of unknown causes He joins a growing list of imprisoned political activists who have died after being denied adequate medical treatment For human rights defenders in China prison sentences are increasingly turning into death sentences This is unacceptable and must change Official stance by the NGO BTB Global Peacebuilding on China's Human Rights crisis We are expecting that the Chinese Communist Party shows some gesture of goodwill that it is willing to evolve and improve itself Otherwise severe international sanctions must be implemented against the Chinese government which might well cripple China's economy Hence we are encouraging the Chinese Communist Party to come out of the Stone Age and join the rest of the International Community by finally implementing civil rights and democracy in China Love and Light Mark O Doherty BTB Global Peacebuilding

Order and Organism Murray Code, 1985-06-30 What is now needed is a way of thinking about the physical that is realistic in outlook but which departs radically from the mechanistic post Galilean tradition Since it seems clear that we can no longer take for granted the certainty and absolute objectivity of scientific knowledge any alternative view must be able to do full justice to subjective modes of knowing Order and Organism shows how Alfred North Whitehead's thought can reconcile some of the most insistent demands of common sense with the esoteric results of modern physics and mathematics Whitehead shows a way to resolve the perennial puzzle of why mathematics works Under his view it is possible to account for the necessity and uniqueness of mathematical theories without denying the fact that such theories often arise from the mathematician's essentially aesthetic interest in various kinds of pattern

Philosophy of Physics

Jeremy Butterfield, John Earman, 2007 The ambition of this volume is twofold to provide a comprehensive overview of the field and to serve as an indispensable reference work for anyone who wants to work in it For example any philosopher who hopes to make a contribution to the topic of the classical quantum correspondence will have to begin by consulting Klaas Landsman's chapter The organization of this volume as well as the choice of topics is based on the conviction that the important problems in the philosophy of physics arise from studying the foundations of the fundamental theories of physics It follows that there is no sharp line to be drawn between philosophy of physics and physics itself Some of the best work in the philosophy of physics is being done by physicists as witnessed by the fact that several of the contributors to the volume are theoretical physicists viz Ellis Emch Harvey Landsman Rovelli t Hooft the last of whom is a Nobel laureate Key features

Definitive discussions of the philosophical implications of modern physics Masterly expositions of the fundamental theories of modern physics Covers all three main pillars of modern physics relativity theory quantum theory and thermal physics Covers the new sciences grown from these theories for example cosmology from relativity theory and quantum information and quantum computing from quantum theory Contains special Chapters that address crucial topics that arise in several different theories such as symmetry and determinism Written by very distinguished theoretical physicists including a Nobel Laureate as well as by philosophers
