Real And The Ideal:

Between Real and Ideal William H. McClain, 1963 *The Real in the Ideal* R.C.S. Walker, 2019-04-25 This book first published in 1989 presents sixteen articles on Kant and Berkeley examining their attitude to the physical world They were both idealists regarding the physical world as being in some way a product of perceptions and thought At the same time they both held it to be no mere illusion but real and objective it was in a sense ideal but in a different sense also real **The American Ideal** Peter Carafiol, 1991-08-22 This work argues that American literary scholarship enshrines a reactionary vision of history of narrative and of America itself Carafiol examines the way idealist assumptions have been essential to doing American literary history and unwraps the implications of that symbiosis for current debates about the aims and methods of literary history in general Carafiol directs his critique not only at traditional approaches to American literature but also at the most influential recent efforts by New Historicists and cultural critics to revise that tradition Reconsidering the debate between ahistorical and historical models of literary study he argues that works by such writers like Emerson and Thoreau subvert the claims of critics on both sides Such writing is important he proposes not as timeless art or as social document but as a voice that can speak powerfully in contemporary conversations challenging literary critics in all fields to reconsider their critical assumptions and professional practices **The Notebooks of Samuel Taylor Coleridge, Volume 4** Samuel Taylor Coleridge, 2019-08-06 theological philosophical scientific social and psychological matters plans for and fragments of works and many other items of great interest This fourth double volume of the Notebooks covers the years 1819 through 1826 The range of Coleridge's reading his endless questioning and his recondite sources continue to fascinate the readers Included here are drafts and full versions of the later poems Many passages reflect the technological interests that led to Coleridge's writing of *Aids of Reflection* later to become an important source for the Transcendentalists Another development in this volume is the startling expansion of Coleridge's interest in the theory of life and in chemistry the laboratory chemistry of the Royal Institution of Great Britain and the theoretical chemistry of German transcendentalists such as Oersted and Steffens Also contained in this volume is an important section on the meaning of marriage Kathleen Coburn is Professor Emerita at Victoria College of the University of Toronto Merton Christensen was Professor of English at the University of Delaware Bollingen Series L 4 Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 Schelling and Spinoza Benjamin Norris, 2022-08-01 Schelling and Spinoza reconstructs Schelling's reading of Spinoza's metaphysics to better understand the roles realism and idealism play in Schelling's work Schelling initially praises Spinoza's

monism but comes to criticize the lifelessness produced by Spinoza's dualistic account of the relation between thought and existence. By turning to Schelling's notion of the Absolute, author Benjamin Norris presents a novel reading of Schelling's early and middle philosophical endeavors as a kind of ideal realism dependent on the hyphen that marks both the identity and the non-identity of realism and idealism. Through close analysis of Schelling's work, he convincingly argues that any contemporary return to Schelling must grapple with his critique of Spinoza. This critique calls into question the categories of immanence and transcendence that orient the current debate surrounding realism, antirealism, and idealism. Schelling and Spinoza is an important contribution to our understanding of both Schelling and Spinoza, as well as the viability of the frightening claim that only one thing truly exists.

Heinz Werner and Developmental Science Jaan Valsiner, 2005
Heinz Werner (1890-1964) was one of the three key developmental psychologists of the 20th century, along with Jean Piaget and Lev Vygotsky. This book is a new exploration of Werner's ideas and their social contexts in Vienna in his student years in Hamburg up to 1933, followed by the years of transit as an immigrant to America at times of economic depression, finally culminating in his establishment of the prominent Clark tradition in American psychology in the 1950s. The book offers an in-depth analysis of Werner's ideas as they were originally formulated in Vienna and Hamburg and how they were changed by North American influences. Werner's pivotal role between European and American intellectual traditions is illuminated through the use of rich memories of his former students, unique documents from Werner's personal library at Clark, and analyses of links with other European traditions in philosophy and biological sciences. The European period prior to 1933 in Werner's academic life is found to be definitive for Werner's contributions to science. The ideas developed in his early career continued in the form of a productive empirical research program in the 1950s at Clark. An analysis of the social intellectual climate of the development of psychology in America in the 1950s is a special feature of this book that will further enhance an understanding of Werner's unique contribution. This book will be of interest to developmental psychologists, sociologists, and historians of science, philosophers, practitioners working in special education and neuropsychology, and for general readers interested in the history of ideas and life courses of scientists.

The Notebooks of Samuel Taylor Coleridge Merton Christensen, Kathleen Coburn, 2003-09-02
During his adult life until his death in 1834, Coleridge made entries in more than sixty notebooks. Neither commonplace books nor diaries, but something of both, they contain notes on literary, theological, philosophical, scientific, social, and psychological matters, plans for and fragments of works, and many other items of great interest. This fourth double volume of the Notebooks covers the years 1819 to 1826. The range of Coleridge's reading, his endless questioning, and his recondite sources continue to fascinate the reader. Included here are drafts and full versions of the later poems. Many passages reflect the theological interests that led to Coleridge's writing of *Aids to Reflection*, later to become an important source for the transcendentalists. Another development in this volume is the startling expansion of Coleridge's interest in the theory of life and in chemistry: the laboratory chemistry of the Royal Institute and the theoretical

chemistry of German transcendentalists such as Oken Steffens and Oersted *New York School Journal* ,1899

Schelling and Modern European Philosophy Andrew Bowie,1993 Andrew Bowie s book is the first introduction in English to present F W J Schelling as a major European philosopher in his own right Schelling and Modern European Philosophy surveys the whole of Schelling s philosophical career lucidly reconstructing his key arguments particularly those against Hegel and relating them to contemporary philosophical discussion Dr Bowie traces how central ideas and conceptual strategies in the work of philosophers as diverse as Nietzsche Heidegger Derrida and Davidson relate closely to Schelling s often misunderstood philosophy and focuses on Schelling s work as an alternative to and critique of aspects of Hegel s thinking **The Century Dictionary** ,1889
