Exploring the darkest corners of the national psyche and the nethermost regions of the self, the gothic, the grotesque, and the carnivalesque, Mark Dery makes sense of the cultural dynamics of the American madhouse early in the twenty-first century. Here are essays on the pornographic fantasies of Star Trek fans, Facebook as Limbo of the Lost, George W. Bush's fear of his inner queer, the theme parking of the Holocaust, the homoerotic subtext of the Super Bowl, the hidden agendas of IQ tests, Santa's secret kinship with Satan, the sadism of dentists, Hitler's afterlife on YouTube, the sexual identity of 2001's HAL, the suicide note considered as a literary genre, the surrealist poetry of robot spam, the zombie apocalypse, Lady Gaga, the Church of Euthanasia, toy guns in the dream lives of American boys, and the polymorphous perversity of Madonna's big toe. Dery casts a critical eye on the accepted order of things, boldly crossing into the intellectual no-fly zones demarcated by cultural warriors on both sides of America's ideological divide: controversy, phobic corporate media, blinkered academic elites, and middlebrow tastemakers. Intellectually omnivorous and promiscuously interdisciplinary, Dery's writing is a generalist's guilty pleasure in an age of nanospecialization and niche marketing. From Menckenesque polemics on American society and deft deconstructions of pop culture to unflinching personal essays in which Dery turns his scalpel sharp wit on himself, *I Must Not Think Bad Thoughts* is a head-spinning intellectual ride through American dreams and American nightmares. The Dynamics of Language Use Christopher S. Butler, María de los Angeles Gómez González, Susana M. Doval-Suárez, 2005-09-22 This book brings together a collection of articles characterized by two main themes: the contrastive study of parallel phenomena in two or more languages and an essentially functional approach in which language is regarded first and foremost as a rich and complex communication system inextricably embedded in sociocultural and psychological contexts of use. The majority of the studies reported is empirical in nature, many making use of corpora or other textual materials in the language(s) under investigation. The book begins with an introductory section in which the editors provide surveys of the state of the art in both functional and contrastive linguistics. The other five sections of the volume are devoted to: i) a cognitive perspective on form and function; ii) information structure; iii) collocations and formulaic language; iv) language learning; and v) discourse and culture. **Animal Hunting and Feeding** Natalie Goldstein, 2009 All animals have to eat, but feeding behavior goes far beyond predators and prey. Animals have a variety of ways to find food. Some sit and wait for food to come to them. Others chase or trap their food. Other animals are scavengers and decomposers, breaking down the leftovers of other animals' meals. *Animal Hunting and Feeding* explains these various techniques as well as the importance of food chains and food webs. *Are You Loathsome Tonight?* Poppy Z.
