The Enigma of the Oceanic Feeling William B. Parsons,1999-06-17 This study examines the history of the psychoanalytic theory of mysticism starting with the seminal correspondence between Freud and Romain Rolland concerning the concept of oceanic feeling Providing a corrective to current views which frame psychoanalysis as pathologizing mysticism Parsons reveals the existence of three models entertained by Freud and Rolland the classical reductive ego adaptive and transformational which allows for a transcendent dimension to mysticism Then reconstructing Rolland s personal mysticism the oceanic feeling through texts and letters unavailable to Freud Parsons argues that Freud misinterpreted the oceanic feeling In offering a fresh interpretation of Rolland s mysticism Parsons constructs a new dialogical approach for psychoanalytic theory of mysticism which integrates culture studies developmental perspectives and the deep epistemological and transcendent claims of the mystics

Einstein and Twentieth-Century Politics Richard Crockatt,2016-09-22 Albert Einstein world renowned as a physicist was also publicly committed to radical political views Despite the vast literature on Einstein Einstein and Twentieth Century Politics is the first comprehensive study of his politics covering his opinions and campaigns on pacifism Zionism control of nuclear weapons world government freedom and racial equality Most studies look at Einstein in isolation but here he is viewed alongside a liberal international of global intellectuals including Gandhi Albert Schweitzer Bertrand Russell H G Wells George Bernard Shaw Romain Rolland Thomas Mann and John Dewey Frequently called upon to join campaigns on great issues of war peace and social values they all knew or corresponded with Einstein This volume examines how Einstein and comparable intellectuals sought to exert a salutary influence as Einstein put it in a letter to Freud Close attention is given to the unique qualities Einstein brought to his interventions in political debate His influence derived in the first instance from his celebrity status as the scientist of genius whose theory of relativity was both incomprehensible to most and seemingly relevant to many aspects of aspects of culture and the cosmos Einstein s complex and enigmatic personality which combined intense devotion to privacy and a capacity to perform on the public stage also contributed to the Einstein myth Studying Einstein s politics it is argued here takes us not only into the mind of Einstein but to the heart of the great public issues of the twentieth century

The ^AComposer as

Intellectual Jane F. Fulcher, 2005-08-25 In *The Composer as Intellectual* musicologist Jane Fulcher reveals the extent to which leading French composers between the World Wars were not only aware of but also engaged intellectually and creatively with the central political and ideological issues of the period. Employing recent sociological and historical insights, she demonstrates the extent to which composers, particularly those in Paris since the Dreyfus Affair, considered themselves and were considered to be intellectuals and interacted closely with intellectuals in other fields. Their consciousness, raised by the First World War and the xenophobic nationalism of official culture, some joined parties or movements allying themselves with and propagating different sets of cultural and political social goals. Fulcher shows how these composers furthered their ideals through the specific language and means of their art, rejecting the dominant cultural exclusions or constraints of conservative postwar institutions and creatively translating their cultural values into terms of form and style. This was not only the case with Debussy in wartime but with Ravel in the twenties when he became a socialist and unequivocally refused to espouse a narrow exclusionary nationalism. It was also the case with the group called Les Six who responded culturally in the twenties and then politically in the thirties when most of them supported the programs of the Popular Front. Others could not be enthusiastic about the latter and largely excluded from official culture sought out more compatible movements or returned to the Catholic Church. Like many French Catholics, they faced the crisis of Catholicism in the thirties when the church not only supported Franco but Mussolini's imperialistic aggression in Ethiopia. While Poulenc embraced traditional Catholicism, Messiaen turned to more progressive Catholic movements that embraced modern art and insisted that religion must cross national and racial boundaries. Fulcher demonstrates how closely music had become a field of clashing ideologies in this period. She shows also how certain French composers responded and how their responses influenced specific aspects of their professional and stylistic development. She thus argues that from this perspective we can not only better understand specific aspects of the stylistic evolution of these composers but also perceive the role that their art played in the ideological battles and in heightening cultural political awareness of their time. International Communism and Transnational Solidarity: Radical Networks, Mass Movements and Global Politics, 1919-1939, 2016-11-21 This book provides an analysis of the articulation and organisation of radical international solidarity by organisations that were either connected to or had been established by the Communist International (Comintern), such as the International Red Aid, the International Workers Relief, the League Against Imperialism, the International of Seamen and Harbour Workers, and the International Trade Union Committee of Negro Workers. The guiding light of these organisations was a radical interpretation of international solidarity, usually in combination with concepts and visions of gender, race, and class, as well as anti-capitalism, anti-imperialism, anti-colonialism, and anti-fascism. All of these new

transnational networks form a controversial part of the contemporary history of international organisations Like the Comintern these international organisations had an ambiguous character that does not fit nicely into the traditional typologies of international organisations as they were neither international governmental organisations nor international non governmental organisations They constituted a radical continuation of the pre First World War Left and exemplified an attempt to implement the ideas and movements of a new type of radical international solidarity not only in Europe but on a global scale Contributors are Gleb J Albert Bernhard H Bayerlein Kasper Brask n Fredrik Petersson Holger Weiss **French Writers and the Politics of Complicity** Richard J. Golsan, 2006-02 Focusing on the political commitments of three French writers who collaborated with the Vichy Regime and Nazi Germany during World War II and on those of three leading French intellectuals of the 1990s whose misplaced political idealism led them to support xenophobic authoritarian regimes and dangerous historical revisionisms Richard J Golsan reexamines the notion of political commitment or engagement in two difficult periods in modern French history Discussing the fiction essays and journalism of Henry de Montherlant Jean Giono and Alphonse de Chateaubriant Golsan explores the complexity of artistic and intellectual collaboration during the German Occupation He demonstrates that in this context complicity with political evil often derived from nonpolitical motives including sexual orientation antimodern aesthetics and dangerously skewed religious beliefs Turning to the post cold war era of the 1990s Golsan examines the philosopher Alain Finkielkraut s support for Croatian independence the mediologist Rgis Debray s pro Serb stance during the bombing of Kosovo and the historian Stéphane Courtois s revisionist comparison of Nazi and Communist crimes during the 1997 debate surrounding the publication of The Black Book of Communism In these three cases laudable motives and misguided historical comparisons with Vichy Nazism and the Occupation period that marked the political and intellectual discourses of France in the 1990s resulted paradoxically in antidemocratic engagements profoundly at odds with the original motivations behind these intellectuals commitments In each of these case studies political complicity derives from a combination of passions and ideals whether positive or negative emotional or intellectual as well as a desire to make the present conform to a particular and generally skewed vision of the past The full implications of these involvements are neither fully grasped nor understood by their authors either through lack of objectivity rationality or imagination or through willful ignorance The results are always unfortunate and often disastrous Considered together these six intellectuals serve as sobering reminders that political commitments are never as simple or straightforward as they seem and that admirable motives for political involvement can have dangerous and destructive consequences in historical practice
