Fluid Mechanics of Environmental Interfaces, Second Edition Carlo Gualtieri,Dragutin T. Mihailovic,2012-11-21 Environmental Fluid Mechanics EFM studies the motion of air and water at several different scales the fate and transport of species carried along by these fluids and the interactions among those flows and geological biological and engineered systems EFM emerged some decades ago as a response to the need for tools to study problems of flow and transport in rivers estuaries lakes groundwater and the atmosphere it is a topic of increasing importance for decision makers engineers and researchers alike The second edition of the successful textbook Fluid Mechanics of Environmental Interfaces is still aimed at providing a comprehensive overview of fluid mechanical processes occurring at the different interfaces existing in the realm of EFM such as the air water interface the air land interface the water sediment interface the surface water groundwater interface the water vegetation interface and the water biological systems interface Across any of these interfaces mass momentum and heat are exchanged through different fluid mechanical processes over various spatial and temporal scales In this second edition the unique feature of this book considering all the topics from the point of view of the concept of environmental interface was maintained while the chapters were updated and five new chapters have been added to significantly enlarge the coverage of the subject area The book starts with a chapter introducing the concept of EFM and its scope scales processes and systems Then the book is structured in three parts with fifteen chapters Part one which is composed of four chapters covers the processes occurring at the interfaces between the atmosphere and the surface of the land and the seas including the transport of dust and the dispersion of passive substances within the atmosphere Part two deals in five chapters with the fluid mechanics at the air water interface at small scales and sediment water interface including the advective diffusion of air bubbles the hyporheic exchange and the tidal bores Finally part three discusses in six chapters the processes at the interfaces between fluids and biotic systems such as transport processes in the soil vegetation lower atmosphere system turbulence and wind above and within the forest canopy flow and mass transport in vegetated open

channels transport processes to and from benthic plants and animals and coupling between interacting environmental interfaces Each chapter has an educational part which is structured in four sections a synopsis of the chapter a list of keywords that the reader should have encountered in the chapter a list of questions and a list of unsolved problems related to the topics covered by the chapter The book will be of interest to graduate students and researchers in environmental sciences civil engineering and environmental engineering geo physics atmospheric science meteorology limnology oceanography and applied mathematics Manual of Grammatical Interfaces in Romance Susann Fischer, Christoph

Gabriel, 2016-09-12 Different components of grammar interact in non trivial ways It has been under debate what the actual range of interaction is and how we can most appropriately represent this in grammatical theory The volume provides a general overview of various topics in the linguistics of Romance languages by examining them through the interaction of grammatical components and functions as a state of the art report but at the same time as a manual of Romance languages

Art & D Joke Brouwer, 2005 Art D considers changes in art practice due to media to that new branch of art making known primarily as electronic art Use of radio and video came first about 25 years ago but over the last ten years digital media and network technology have reigned This new discipline embraces a heterogeneous collection of artistic technological and scientific disciplines and is also characterized by inter and trans disciplinary collaborations Electronic art proved a troublesome fit for existing art institutions necessitating the founding of specialized organizations for the funding and creation of relatively expensive process based projects And they were digital art laboratories were established around the world with the financial support of governments arts foundations industry scientific programs and so on Art D is a critical consideration of the many artistic technical and theoretical aspects of making electronic art in such interdisciplinary collaborations It sets out to describe in layman s terms the cultural social and political economic transformations that are the result of the widespread propagation of digital techniques FishBase 2000 R.
