Rome Reborn The Vatican Library And Renaissance Culture:

Rome Reborn Anthony Grafton, 1993-01-01 The Vatican Library contains the richest collection of western manuscripts and early printed books in the world and its holdings have both reflected and helped to shape the intellectual development of Europe One of the central institutions of Italian Renaissance culture it has served since its origin in the mid fifteenth century as a center of research for topics as diverse as the early history of the city of Rome and the structure of the universe This extraordinarily beautiful book which contains over 200 color illustrations introduces the reader to the Vatican Library and examines in particular its development during the Renaissance Distinguished scholars discuss the Library's holdings and the historical circumstances of its growth presenting a fascinating cast of characters popes artists collectors scholars and scientists who influenced how the Library evolved The authors examine subjects ranging from Renaissance humanism to Church relations with China and the Islamic world to the status of medicine and the life sciences in antiquity and during the Renaissance Their essays are supported by a lavish display of maps books prints and other examples of the Library's collection including the Palatine Virgil a fifth century manuscript a letter from King Henry VIII to Anne Boleyn and an autographed poem by Petrarch The book serves as the catalog for a major exhibition at the Library of Congress that presents a selection of the Vatican Library's magnificent treasures Rome reborn ,1996 Rome Reborn ,1996 Presents one of the great libraries of the world the Biblioteca Apostolica Vaticana Vatican Library and manuscripts rare books maps and fine prints in its collection **Teologie** ,199? The School of Montaigne in Early Modern Europe Warren Boutcher, 2017-03-09 This major two volume study offers an interdisciplinary analysis of Montaigne's Essais and their fortunes in early modern Europe and the modern western university Volume one focuses on contexts from within Montaigne's own milieu and on the ways in which his book made him a patron author or instant classic in the eyes of his editor Marie de Gournay and his promoter Justus Lipsius Volume two focuses on the reader writers across Europe who used the Essais to make their own works from corrected editions and translations in print to life writing and personal records in manuscript The two volumes work together to offer a new picture of the book's significance in literary and intellectual history Montaigne's is now usually understood to be the school of late humanism or of Pyrrhonian scepticism This study argues that the school of Montaigne potentially included everyone in early modern Europe with occasion and means to read and write for themselves and for their friends and family unconstrained by an official function or scholastic institution For the Essais were shaped by a battle that had intensified since the Reformation and that would continue through to the pre Enlightenment period It was a battle to regulate the educated individual's judgement in reading and acting upon the two books bequeathed by God to man The book of scriptures and the book of nature were becoming more accessible through print and manuscript cultures But at the same time that access was being mediated more intensively by teachers such as clerics and humanists by censors and institutions by learned authors of past and present and by commentaries and glosses upon those authors Montaigne enfranchised the

unofficial reader writer with liberties of judgement offered and taken in the specific historical conditions of his era The study draws on new ways of approaching literary history through the history of the book and of reading The *Essais* are treated as a mobile transnational work that travelled from Bordeaux to Paris and beyond to markets in other countries from England and Switzerland to Italy and the Low Countries Close analysis of editions paratexts translations and annotated copies is informed by a distinct concept of the social context of a text The concept is derived from anthropologist Alfred Gell's notion of the art nexus the specific types of actions and agency relations mediated by works of art understood as indexes that give rise to inferences of particular kinds Throughout the two volumes the focus is on the particular nexus in which a copy an edition an extract is embedded and on the way that nexus might be described by early modern people *Omnia disce - Medieval Studies in Memory of Leonard Boyle, O.P.* Joan Greatrex, 2017-09-08 The eighteen studies included here reflect three particular aspects of Leonard Boyle's remarkable impact on teaching and scholarship His abiding interest in the early history and architecture of the basilica of San Clemente in Rome forms the focus of Part I his profound contribution to the theory and practice of palaeography is reflected in Part II and his creative work on clerical education pastoral care and the Dominican Order inspires Part III In all these areas Fr Boyle combined remarkable attention to detail with the humane ability to bring clarity to complex issues This book commemorates his inspiration but also reflects his favourite maxim derived from the twelfth century teacher theologian Hugh of St Victor to Learn everything for afterwards you will find that nothing is superfluous The fourth section is devoted to Fr Leonard as friend scholar and Prefect of the Vatican Library and it ends fittingly with what may be regarded as his own scholarly valediction St Thomas Aquinas and the Third Millennium **Art Information and the Internet** Lois Swan Jones, 2013-12-16 In the first book of its kind art information expert Lois Swan Jones discusses how to locate visual and textual information on the Internet and how to evaluate and supplement that information with material from other formats print sources CD ROMS documentary videos and microfiche sets to produce excellent research results The book is divided into three sections Basic Information Formats Types of Websites and How to Find Them and How to Use Web Information Jones discusses the strengths and limitations of Websites scholarly and basic information resources are noted and search strategies for finding pertinent Websites are included Art Information and the Internet also discusses research methodology for studying art historical styles artists working in various media individual works of art and non Western cultures as well as art education writing about art problems of copyright and issues concerning the buying and selling of art This title will be periodically updated **Sapientia Astrologica: Astrology, Magic and Natural Knowledge, ca. 1250-1800** H Darrel Rutkin, 2019-04-24 This book explores the changing perspective of astrology from the Middle Ages to the Early Modern Era It introduces a framework for understanding both its former centrality and its later removal from legitimate knowledge and practice The discussion reconstructs the changing roles of astrology in Western science theology and culture from 1250 to 1500 The author considers both the how and the why He analyzes and integrates a

broad range of sources This analysis shows that the history of astrology in particular the story of the protracted criticism and ultimate removal of astrology from the realm of legitimate knowledge and practice is crucial for fully understanding the transition from premodern Aristotelian Ptolemaic natural philosophy to modern Newtonian science This removal the author argues was neither obvious nor unproblematic Astrology was not some sort of magical nebulous hodge podge of beliefs Rather astrology emerged in the 13th century as a richly mathematical system that served to integrate astronomy and natural philosophy precisely the aim of the New Science of the 17th century As such it becomes a fundamentally important historical question to determine why this promising astrological synthesis was rejected in favor of a rather different mathematical natural philosophy and one with a very different causal structure than Aristotle's

The Story of Libraries, Second Edition Fred Lerner, 2009-12-24 This work describes the crucial role libraries played in ancient Egypt Han dynasty China the ancient Western Classical world the great library of Alexandria which was lost to us in stages over many years the Baghdad of Harun al Rashid and medieval and Renaissance Europe It continues with the libraries of colonial America the Library of Congress university libraries and today's large public library system Thornton and Tully's Scientific Books, Libraries and Collectors Andrew Hunter, 2016-12-05 In the 25 years since the last edition of Thornton and Tully's Scientific Books Libraries and Collectors was published scientific publishing has mushroomed developed new forms and the academic discipline and popular appreciation of the history of science have grown apace This fourth edition discusses these changes and ponders the implications of developments in publishing at the end of the twentieth century while concentrating its gaze upon the dissemination of scientific ideas and knowledge from Antiquity to the industrial age In this shift of focus it departs from previous editions and for the first time a chapter on Islamic science is included Recurrent themes in several of the ten essays in the present volume are the definition of science itself and its transmutation by publishing media and the social context Two essays on the collecting of scientific books provide a counterpoint and the book is grounded on a rigorous chapter on bibliographies The timely publication of Scientific Books Libraries and Collectors comes at the coincidence of the advent of electronic publishing and the millennium a dramatic moment at which to take stock
