Roof Of The World Mans First Flight Over Everest:

Roof of the World Lord James Douglas-Hamilton,2013-02-08 On the morning of 3 April 1933 two single engine biplanes set off on a flight into history From their base near the Indian border with the mystery country of Nepal the two young pilots one a British Marquis and a Scottish Member of Parliament the other a dynamic flight commander flew towards as great a challenge as world aviation had faced to date Mount Everest Roof of the World The first flight over Everest was the climax of years of thought and months of intensive planning an epoch making event which caught the imagination of millions News of its success reverberated throughout the British Empire to the world at large Among the deluge of telegrams of congratulations received were those from the King and the Prime Minister The Times of London which had given exclusive coverage of the Expedition since its early days carried one of its longest features ever and was excited enough to comment that the achievement was almost like exploring the rainbow Some half a century later that Houston Mount Everest Expedition takes its place as one of the last great pioneering flights before the era of space travel Roof of the World tells the remarkable story of that flight and its repercussions among which were the growth of the British aviation industry and the creation of the country s second international airport Using rare and unique photographs many taken from the flight itself and giving an idea of the qualities required of the crews Lord James Douglas Hamilton has recreated the scene facing the pilots one of whom was his father He has had access to relevant diaries and personal papers presents in Roof of the World a valuable contribution to our understanding of a unique achievement in an eventful decade *Scotland's Wings* Robert Jeffrey,2022-09-15 Scotland has a worldwide reputation for launching some of the greatest ships ever built but far less is known about our pioneering work on aviation Yet in the great industrial cities and remote islands across the country men and women risked their reputations resources and lives to advance experiments in flight Before airliners crossed the Atlantic Ocean and bombers secretly flew into the NATO airbase at Machrihanish pioneers of aviation worked in the unlikely surroundings of Kelvingrove Park in Glasgow among other places Their humble flying crafts made with wood and canvas would become the luxurious jet engined aircraft of today Including the first flight over Everest the construction of the most northerly airship station in mainland Britain and the experience of civilians and pilots during the Clydebank Blitz of 1941 Scotland s Wings is a glimpse into the dramatic and sometimes controversial adventures within Scottish aeronautics In Scotland s Wings Robert Jeffrey tells a fascinating history highlighting innovators whose ideas heralded the modern age of transport and revealing how the airfields of previous years will once again be used to progress into a daring new age of travel

Making Friends with Hitler Ian Kershaw, 2005-10-25 Ian Kershaw's biography of Adolf Hitler is widely regarded as the definitive work on the subject as well as one of the most brilliant biographies of our time In *Making Friends with Hitler* the great scholar shines remarkable new light on decisions that led to war by tracing the extraordinary story of Lord Londonderry one of Britain's wealthiest aristocrats cousin of Winston Churchill confidant of the king and the only British cabinet member to outwardly support the Nazi party Through Londonderry's tragic tale Kershaw shows us that behind the accepted dogma of English appeasement and German bullying is a much more complicated and interesting reality full of miscalculations on both sides that proved to be among the most fateful in history

Transforming the Skies Peter Reese,2018-02-16 Following the Armistice of 1918 the British Air Industry and the newly founded RAF held a low place in national priorities The RAF was rapidly run down with the infant airlines being given the least possible help and this neglect continued during the 1920s The RAF s role was questioned and civilian air travel remained a dream for most and the province of the well heeled few But the breakdown of the Geneva Disarmament Talks led to renewed interest in the National Air Force and the rise of the European dictators brought calls for rapid modernisation and interceptor aircraft together with the development of further European civilian air routes Here Peter Reese charts the dramatic changes that swept aviation across the dynamic interwar period revealing the transformative last minute preparations for defence in a world where much depended on the contributions of some outstanding individuals
