The Psychology of Sympathy Lauren Wispé, 2013-03-09 The origins of this book probably go back to Gordon Allport's seminar in social psychology at Harvard during the late 1940s and to the invitation from Gardner Lindzey some years later to contribute a section on Sympathy and Empathy to the International Encyclopedia of the Social Sciences 1968 Since those early beginnings the book has been in the process of becoming During that time I have benefited greatly from the knowledge and assistance of many colleagues especially the following who read and commented upon portions of the manuscript Raymond Gastil the late Joseph Katz David McClelland Jitendra Mohanty Paul Mussen Richard Solomon and Bernard Weiner To Kenneth Merrill for a close reading of the Hume material and to M Brewster Smith for a careful reading of and suggestions on Chapters 7 and 8 I am especially indebted Beverly Joyce withstood constant interruptions to provide much needed library assistance and Vivian Wheeler gave generously of her excellent editorial experience and knowledge A fellowship at the Battelle Research Center in Seattle and an appointment as a visiting scholar at Harvard were of incalculable help providing opportunity stimulation and freedom from teaching responsibilities To all of the above I am deeply indebted Just a few words about the organization of this book

Theories of Development William Crain, 2015-10-02 The result of extensive scholarship and consultation with leading scholars this text introduces students to twenty four theorists and compares and contrasts their theories on how we develop as individuals Emphasizing the theories that build upon the developmental tradition established by Rousseau this text also covers theories in the environmental learning tradition

Social Development as Preference Management Rachel Karniol, 2010-04-12 Karniol engagingly presents social development in children through the language of preference management Conversational excerpts garnered from around the world trace how parents talk about preferences how infants and children's emergent language conveys their preferences how children themselves are impacted by others preferences and how they in turn influence the preferences of adults and peers The language of preferences is used to crack into altruism aggression and morality which are ways of coming to terms with other people's preferences Behind the scenes is a cognitive engine that uses transformational thought conducting temporal imaginal and mental transformations to figure out other people's preferences and to find more sophisticated means of

outmanoeuvring others by persuading them and playing with one's own mind and other people's minds when preferences are blocked This book is a unique and sometimes amusing must read for anyone interested in child development language acquisition socialisation and communication
