Neutron Scattering - Magnetic and Quantum Phenomena, 2015-11-29 Neutron Scattering Magnetic and Quantum Phenomena provides detailed coverage of the application of neutron scattering in condensed matter research The book's primary aim is to enable researchers in a particular area to identify the aspects of their work where neutron scattering techniques might contribute conceive the important experiments to be done assess what is required to carry them out write a successful proposal for one of the major user facilities and perform the experiments under the guidance of the appropriate instrument scientist An earlier series edited by Kurt Skold and David L Price and published in the 1980s by Academic Press as three volumes in the series Methods of Experimental Physics was very successful and remained the standard reference in the field for several years This present work has similar goals taking into account the advances in experimental techniques over the past quarter century for example neutron reflectivity and spin echo spectroscopy and techniques for probing the dynamics of complex materials of technological relevance This volume complements Price and Fernandez Alonso Eds Neutron Scattering Fundamentals published in November 2013 Covers the application of neutron scattering techniques in the study of quantum and magnetic phenomena including superconductivity multiferroics and nanomagnetism Presents up to date reviews of recent results aimed at enabling the reader to identify new opportunities and plan neutron scattering experiments in their own field Provides a good balance between theory and experimental techniques Provides a complement to Price and Fernandez Alonso Eds Neutron Scattering Fundamentals published in November 2013

Functional Metallosupramolecular Materials John George Hardy, Felix H

Schacher,2015-07-13 There is great interest in metallosupramolecular materials because of their use in magnetic photonic and electronic materials Functional Metallosupramolecular Materials focuses on the applications of these materials covering the chemistry underlying the synthesis of a variety of ligands to coordinate various metal ions and the generation of 2D and 3D materials based on these constructs The book starts by looking at different metallosupramolecular systems including naturally occurring functional metallosupramolecular materials DNA based metallosupramolecular materials metallopolymers metallogels as well as functional materials based on MOFs Subsequent chapters then systematically cover the different applications such as molecular computation spin crossover light harvesting and as photocatalysts for the production of solar fuels The book provides an overview of functional metallosupramolecular materials that will be of interest to graduate students academics and industrial chemists interested in supramolecular chemistry materials science and the materials applications
