Confronting Religious Denial of Science Catherine M. Wallace, 2016-07-05 *Confronting Religious Denial of Science* Christian Humanism and the Moral Imagination traces the cultural backstory of contemporary conflicts between biblical literalists who oppose evolution and New Atheists who insist that religion is so pernicious it should be outlawed if not exterminated That's a clash of fundamentalisms It's a zero sum game derived from high Victorian misunderstanding of both religion and science The God whom science supposedly replaces is the Engineer Almighty sitting at his keyboard controlling every event on earth But that's not a viable concept of God Far better Wallace argues to understand Christianity in Clifford Geertz's terms as a system of symbols that both constitutes a worldview and according to David Sloan Wilson encourages prosocial behavior That reframing makes it possible to reclaim what biblical scholars have said for decades the miracles of Jesus were confrontational symbolic actions They contradicted the political status quo in colonial Palestine not the laws of biology Prayer she explains is not magical thinking It's a creative highly disciplined introspective process most familiar to many people in forms like mindfulness meditation Wallace offers an intriguing exploration of issues that believers seldom discuss in ways that make sense to the religiously unaffiliated **CMJ New Music Report**

Could a child or young adult in your life have an underlying medical condition that is being explained away as a psychiatric problem This type of misdiagnosis has become surprisingly common This is a heartfelt informational true story of a thirteen year old girl who had an unexplained weight loss and other bizarre symptoms that were deemed to be psychological before all avenues of a physical illness were explored The names have all been changed in order to protect the identity of the involved persons The eleven day confinement at a psychiatric hospital involuntary commitment trial and testing for the actual physical illness and simple cure are all documented to explain why this young girl should not have to live with a lifelong label of mental illness This story suggests decisions made in fear are often poor Doctors should not be afraid to tell their patients that they do not know and parents should not be afraid of questioning health care professionals decisions The nearly fatal mistake was thwarted with the support of family friends open minded true professionals and most of all with divine intervention
