U.S. Economic Relations with Latin America United States. Congress. Joint Economic Committee. Subcommittee on Inter-American Economic Relationships, 1977 *Handbook of Latin American Studies* Dolores Moyano Martin, P. Sue Mundell, 1997-12-01 Beginning with volume 41 1979 the University of Texas Press became the publisher of the *Handbook of Latin American Studies* the most comprehensive annual bibliography in the field Compiled by the Hispanic Division of the Library of Congress and annotated by a corps of more than 130 specialists in various disciplines the *Handbook* alternates from year to year between social sciences and humanities The *Handbook* annotates works on Mexico Central America the Caribbean and the Guianas Spanish South America and Brazil as well as materials covering Latin America as a whole Most of the subsections are preceded by introductory essays that serve as biannual evaluations of the literature and research underway in specialized areas The *Handbook of Latin American Studies* is the oldest continuing reference work in the field Dolores Moyano Martin of the Library of Congress Hispanic Division has been the editor since 1977 and P Sue Mundell has been assistant editor since 1994 The subject categories for Volume 55 are as follows Anthropology including Archaeology and Ethnology Economics Electronic Resources for the Social Sciences Geography Government and Politics International Relations Sociology *Re-Envisioning Global Development* Sandra Halperin, 2013-04-17 *Re Envisioning Global Development* offers an original conceptualisation of capitalist development from its origins to the present day Most approaches to understanding contemporary development assume that industrial capitalism was achieved through a process of nationally organised economic growth and that in recent years its organisation has become increasingly trans local or global However Halperin shows that nationally organised economic growth has rarely been the case it has only recently come to characterise a few countries and for only a few decades This innovative text elaborates an alternative ontology and way of thinking about global development during the last two centuries one linked not to nations and regions but to a set of essentially trans national relations and connections It argues that capitalist development has everywhere and from the start involved not whole nations or societies but only sectors or geographical areas within states By bringing this aspect of historically normal capitalist development into clearer focus the book clarifies the specific conditions and circumstances that enabled European economies to pursue a more broad based development following World War II and what prevented a similar outcome in the contemporary third world It also clarifies the nature spatial extent and circumstances of current globalising trends Wide ranging and provocative this book is required reading for advanced level students and scholars in development studies
