Lutoslawski Studies:

Lutosławski Studies: Dans la nuit: the themes of death and night in Lutosławski's œuvre Zbigniew Skowron, 2001

Lutoslawski Studies presents for the first time an overview of the great twentieth century composer Witold Lutoslawski's works and his compositional style. Whereas most previous literature on Lutoslawski's music has focussed on disparate or isolated aspects of his compositional technique, this study encompasses areas such as the composer's aesthetics, the evolution of his style and the compositional strategies which apply to broader periods of his creativity. The international team of contributors, including the leading Lutoslawski scholars Steve Stucky, Charles Bodman Rae and Martina Homma, bring to this study the results of recent research, offering a broader approach that links many issues which have been treated selectively in former studies, as well as throwing new light on the essence of the composer's music and the way in which modern and traditional elements co-exist.

Lutoslawski on Music Zbigniew Skowron, 2007-10-29. The writings of twentieth century Polish composer Witold Lutoslawski reveal many important aspects of his approach to music and his viewpoints as an artist and as a man. In *Lutoslawski on Music*, the first full collection of writings by this famous composer, Zbigniew Skowron has amassed an exciting assortment of essays, speeches, lectures and articles, many of which are newly translated in English and previously unpublished. After an introductory autobiography, the writings are grouped in five parts illustrating various aspects of the composer's creativity and discussing musical form, compositional technique and perception. Lutoslawski examines his own works as well as those of other composers and expresses his views on crucial aspects of twentieth century music, including the role of Schoenberg and Debussy and the impact of the western avant-garde of the 1950s. The book also contains Lutoslawski's *Artistic Diary*, his notebook of ideas written from 1959 to 1984, containing intensely personal reflections that do not appear in his public speeches and writings. Concluding with a select bibliography, this collection will give readers a unique and comprehensive overview of the man and his music, encouraging a full appreciation of Lutoslawski's compositional technique and aesthetic views as well as his position in the history of twentieth century music.

Roger Smalley: A Case Study of Late Twentieth-Century Composition Christopher Mark, 2016-04-08 How does one go about writing the history of musical composition in the late twentieth century when on the one hand so much of it seems impossibly fractured and disassociated and on the other there has been so little certainty about what the notion of music history might entail under the critiques of post modernism One of the most productive ways forward is to pursue case studies involving single composers whose music reflects several aspects of recent activity This enables the discussion of broad issues in a relatively focussed way whilst avoiding the pitfalls of traditional narrative histories and the centrifugal tendencies of the

relativistic approach that some have called for The music of the English born 1943 and Australia domiciled composer Roger Smalley is ideal material for such a study because of his involvement with and response to an unusually large number of the myriad concerns and practices of post 1950s composition including post serial constructivism parody electro acoustic composition and the electronic modification of conventionally produced sound Moment Form aleatorism minimalism the use of non Western resources Aboriginal and South East Asian sonorities neo Romanticism and arguably the new classicism as well as a brief flirtation with rock music in the late 60s Employing an interview with the composer as a kind of cantus firmus the book the first extended single author study of Smalley s music to be published incorporates critical commentary on the composer s major works in a chronological narrative that engages with broad issues of central relevance to Smalley s generation such as the process of learning the craft of composition in the early 60s the motivation behind the adoption of certain technical and aesthetic positions the effects on technical and aesthetic orientation of both the changing relationships between composer performer and audience and technological change and the distinction betwe
