Lyme Disease And Rife Machines With Critical Evaluation Of Leading Alternative Therapies O:

When Antibiotics Fail Bryan Rosner, 2005 This book is about how experimental frequency devices known as rife machines have been used for over 15 years in private homes to successfully fight Lyme Disease Many Lyme Disease sufferers have heard of rife machines some have used them But until now there has not been a concise and reliable source to explain how and why they work

Effective Treatment of Chronic Lyme Disease Otto Salomons, 2009-11 This book is a self help guide for patients suffering from chronic Lyme disease and or other intra cellular infections The book also serves as an information resource for therapists and doctors interested in better treatment options for chronic Lyme disease The book has come forward from the author's own struggle in getting rid of chronic Borrelia and Babesia infections This was not a trivial exercise During this quest the use of bio energetic testing and treatment methods was essential in being successful The bio energetic methods that have been applied are bio resonance and bio photon based methods The presented bio energetic treatment methods can be applied alone or in combination with traditional anti biotics therapy

The Top 10 Lyme Disease Treatments Bryan Rosner, 2007-05 Provides information about effective treatment protocols and supplements to battle Lyme disease

The Management of Lyme Disease Kenneth Lipman, 2005 This PDE identifies analyzes and evaluates the theory and science behind the techniques used most often by health professionals and patients to diagnosis and treat chronic Lyme Disease LD the methodology is synthesis research which triangulates qualitative and quantitative data sources LD is a bacterial infection caused by Borrelia burgdorferi and is generally transmitted by a tick Unlike other bacterial infections LD fails to meet the criteria of Koch's postulates Co infections are often present too Although the primary complaints tend to be arthritic and neurologic many other symptoms are possible which is the reason LD has been called the great imitator LD is rarely fatal but it can cause significant physical mental and social disability For these reasons LD presents unique diagnostic difficulties for conventionally trained physicians the first diagnostic test should be the Western Blot which detects antibodies If the Western Blot is positive other useful confirming tests are the CD57 an indirect marker of LD the Lyme Dot Blot Assay which detects antigens the Polymerase Chain Reaction test and the SPECT scan A commonly used but inaccurate test is the ELISA A kryptopyrrole test should be done to rule out abnormal pyrroles the FISH test for babesiosis a parasitical disease and the FACT test for neurotoxins may also be done For traditional treatment long term antibiotics are often effective but may entail significant side effects the most promising alternative therapies include the Rife machine which imparts a therapeutic electrical current oxygen therapies including hyperbaric oxygen and ozone therapy saunas apitherapy therapeutic bee venom and homeopathy A more aggressive but riskier program might utilize intracellular hyperthermia raising internal temperature to kill bacteria or insulin potentiation therapy manipulating insulin levels to better utilize drugs A significant obstacle to treatment is the herx which is a temporary treatment induced exacerbation of symptoms A survey by the author found that 75% of LD patients used alternative medical treatments On average 73% of those users reported a

benefit from the treatment while 4% reported harmful effects Research is needed in all areas of the diagnosis and treatment of LD especially outcome studies of various treatment protocols
